TABLE OF CONTENTS

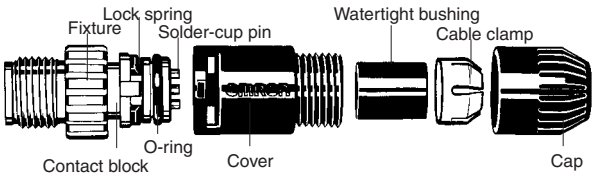
OMRON

Sensor I/O Connectors (M12) | XS2

Water- and Environment-resistive FA Connectors Save Wiring and Maintenance Effort

- Compact FA connectors meet IP67 requirements and ensure a 94V-0 fire retardant rating.
- A wide array of connectors makes a wiring system more modular, simplifies maintenance, and reduces downtime.
- Connectors with Cables and Connector Assemblies are available.
- Three types of Connector Assembly: Crimping, soldering, and screw-on.
- Conforms to IEC 60947-5-2 and NECA 4202.
- UL-listed 4-core cables.

■ Construction (Connector Assembly)



■ Specifications

Rated current	3 A
Rated voltage	125 VDC, 250 VAC
Contact resistance	40 mΩ max. (20 mV max., 100 mA max.) (See note 1.)
Insulation resistance	1,000 MΩ min. (at 500 VDC)
Dielectric strength	1,500 VAC for 1 min (leakage current: 1 mA max.) (See note 2).
Degree of protection	IP67 (IEC529)
Insertion tolerance	200 times min.
Assembled fixture strength	Tensile: 98 N/15 s Torsion: 0.98 N·m/15 s
Cable holding strength	Cable diameter: 6 mm 98 N for 15 s 4 to 5 mm 49 N for 15 s 3 mm 29 N for 15 s
Ambient temperature	Operating: – 25°C to 70°C

Note: **1.** The contact resistance of the connector.
2. The dielectric strength of the connector.

■ Recommended Cables

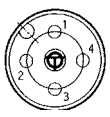
Cable outer diameter		**Core sizes**		
		Crimping models	**Soldering models**	**Screw-on models**
6 mm	5 to 6 mm	Two types of contacts are available. • 0.18 to 0.3 mm^2 • 0.5 to 0.75 mm^2	0.5 mm^2 max.	0.18 to 0.75 mm^2
4 mm	4 to 5 mm			
3 mm	3 to 4 mm			

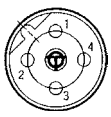
■ Materials and Finish

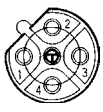
Item		**XS2F/H/W**	**XS2M/R/P**	**XS2C/G**
Contacts	Materials	Phosphor bronze	Brass	
	Finish	Nickel base, 0.4-μm gold plating		
Fixtures	Materials	Brass (See note 2.)		
	Finish	Nickel plated (See note 2.)		
Pin Block	Materials	PBT resin (UL94V-0)	PA resin (UL94V-0)	PBT resin (UL94V-0)
	Finish	For DC: light gray; for AC: dark gray		
O-ring/rubber bushing		Rubber		
Cover		Polyester elastomer	---	PBT resin (UL94V-0)
Cap		---	---	PBT resin (UL94V-0)
Cable clamp		---	---	PA resin (UL94V-0)
Pin clamp		---	---	PBT resin (UL94V-0)
Lock spring		---	---	LCP resin (UL94V-0)
Watertight bushing		---	---	Rubber
Ring		---	---	Steel

Note: **1.** The XS2H does not have an O-ring.
2. The T-joint of the XS2R is aluminum/white.

■ Socket Appearance

DC type		**AC type**	
Male contacts	**Female contacts**	**Male contacts**	**Female contacts**
			






Note: The AC and DC connectors are different as shown here and therefore cannot be connected together.

■ List of Products

Name	Model		Appearance	Page
Connectors attached to Cable	XS2W Sockets and Plugs on Cable Ends			3 to 4
	XS2F Sockets on One Cable End			6 to 10
	XS2H Plugs on One Cable End			11 to 12
Connector Assemblies (Crimping, Soldering, or Screw-on) Used to enable using connectors for sensor cables and relay cables.	XS2G Plug Assemblies			16, 18
	XS2C Socket Assemblies			17, 19
	XS2F Crimp Tool (for Crimping Connectors)			27
	XW4Z Screwdriver (for Screw-on Connectors)			29
Terminal Box Connectors Used to enable using connectors for terminal boxes.	XS2P Panel-mounting Sockets			20
T-Joints and Y-Joints Used for branching and for daisy-chain connections.	XS2R T-Joint/Y-Joint Plug/Socket Connectors	T-Joints		22 to 23
		Y-Joints		21
Sensor Connector Assemblies Used to enable using connectors in sensors.	XS2M Plugs	Embedded Plugs with Screw Threads		24 to 25
		Embedded Plugs with No Screw Threads		
Panel-mounting Connectors Used to enable using I/O box connectors mounted to panels.	XS2M Plugs	Flange-mounting Plugs		
		Screw-mounting Plugs

XS2F-□42□-□□0-TR Connecting Cables for E2E Proximity Sensors

The pin numbers and lead colors of the E2E Proximity Sensors are used for the XW2E Connecting Cable. This cable is designed specifically for the E2E. It is distinguished from normal XS2F models by the dark gray cable and the -TR suffix added to the 4-digit lot number.

■ Ordering Information

Cable connection direction	No. of cable cores	Cable core cross-sectional area	Cable length (m)	Model		Minimum order
				DC	AC	
Straight	2	0.5 mm^2	2	XS2F-D421-DD0-TR	XS2F-A421-DB0-TR	10

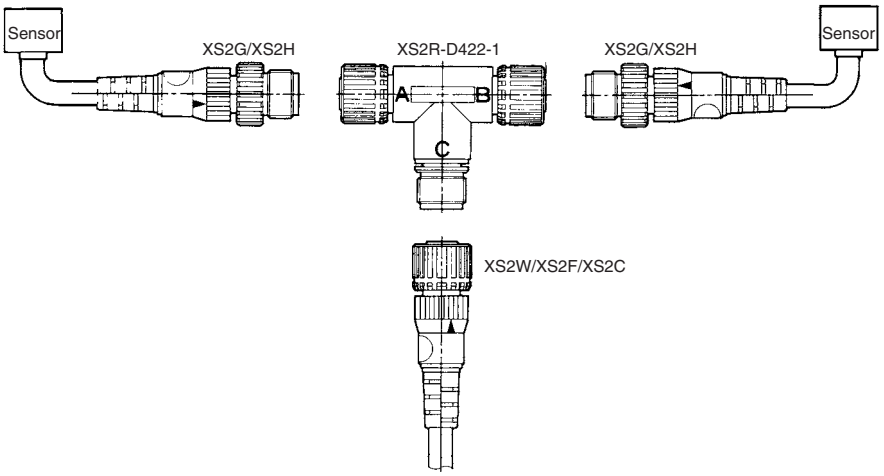
■ Precautions

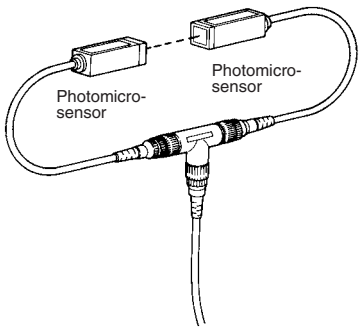
Before using the XS2R for Sensors, make sure that the wiring of the Sensors and the internal connections of the XS2R are correct.

XS2R Application Examples

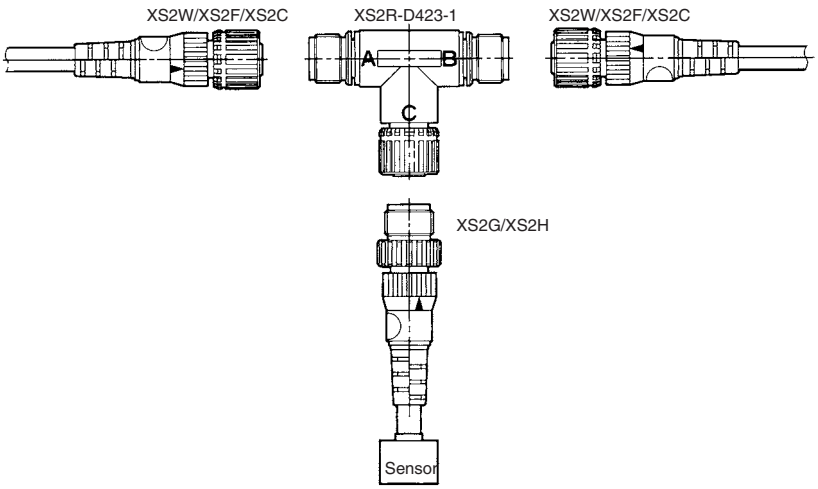
XS2R-D422-1 (Aggregate Model)



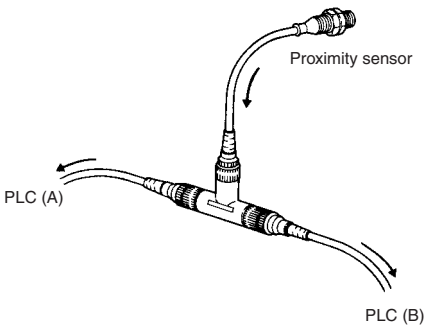
A pair of Two-wire Sensors or Three-wire Sensors can be connected as shown in the illustration.
The XS2R-D422-5 has feed-through connections, thus working as a connector for the extension cable.



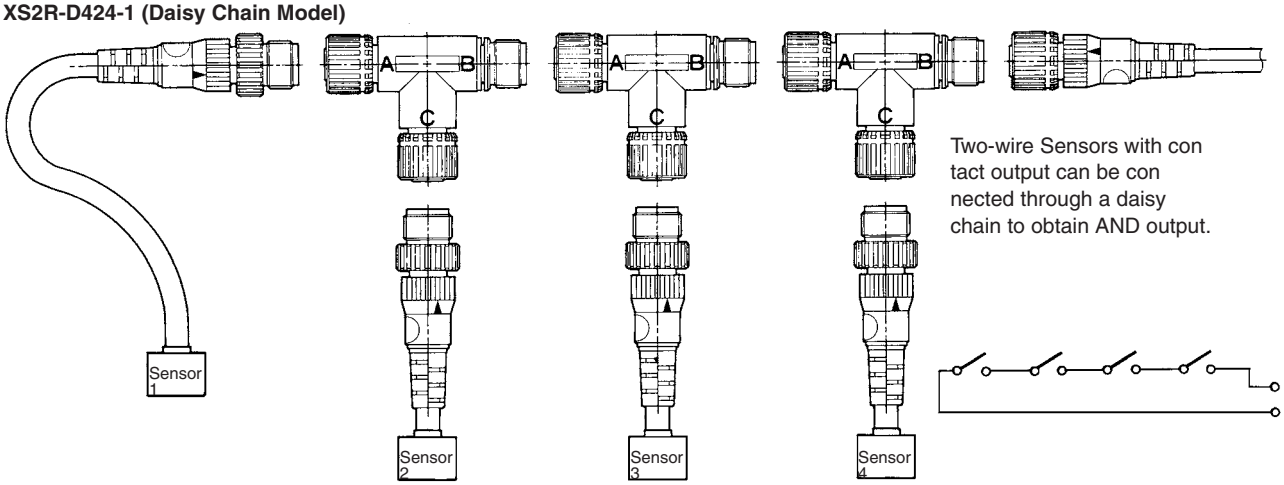
XS2R-D423-1 (Bifurcated Model)



Two or Three-wire Sensor signals can be bifurcated.



XS2R-D424-1 (Daisy Chain Model)



Two-wire Sensors with con tact output can be con nected through a daisy chain to obtain AND output.

■ Ordering Information

Mounting method	Pin shape	Model		Minimum order

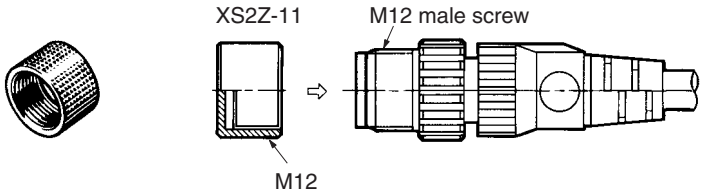
XS2 Accessories

■ XS2 Connector Covers

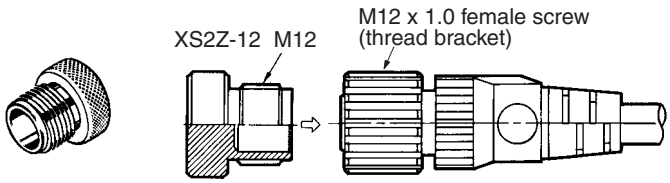
Water-resistive Covers

XS2Z-11

The Water-resistive Cover ensures IP67. When mounting the Water-resistive Cover to a Connector, be sure to apply a torque range between 0.39 and 0.49 N·m to tighten the Water-resistive Cover.



XS2Z-12



■ Ordering Information

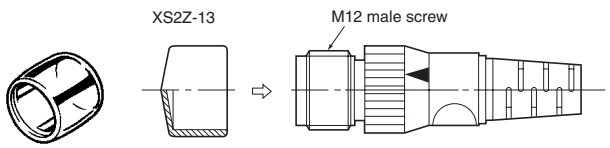
Model	Minimum order	Material	Suitable connector	
			Model	Mounting portion
XS2Z-11	50	Brass/nickel plated	XS2G/XS2H/XS2M/XS2R	M12 male screw
XS2Z-12			XS2C/XS2R/XS2F/XS2P/XW3B	M12 female screw (thread bracket)

Note: Orders are accepted in multiples of the minimum order.

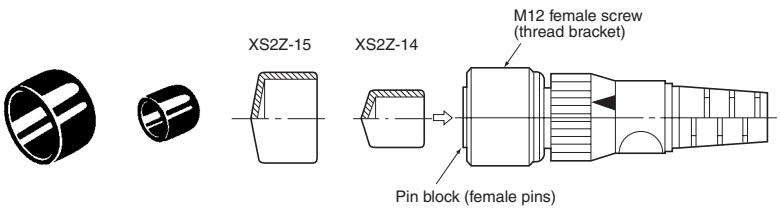
Dust Covers

XS2Z-13

The Dust Cover is for dust prevention and does not ensure IP67 degree of protection. When mounting the Dust Cover to a connector, be sure to press the Dust Cover onto the Connector until the Connector is fully inserted into the Dust Cover.



XS2Z-15/XS1Z-14



■ Ordering Information

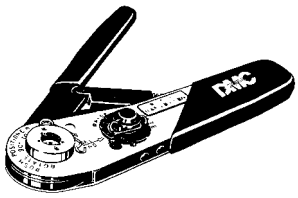
Model	Minimum order	Material	Suitable connector	
			Model	Mounting portion
XS2Z-13	50	Transparent polyvinyl chloride	XS2G/XS2H/XS2M/XS2R	M12 male screw
XS2Z-14		Red polyvinyl chloride	XS2C/XS2R/XS2F/XS2P/ XW3B	Pin block (female pins)
XS2Z-15				M12 female screw (thread bracket)

Note: Orders are accepted in multiples of the minimum order.

■ Tools

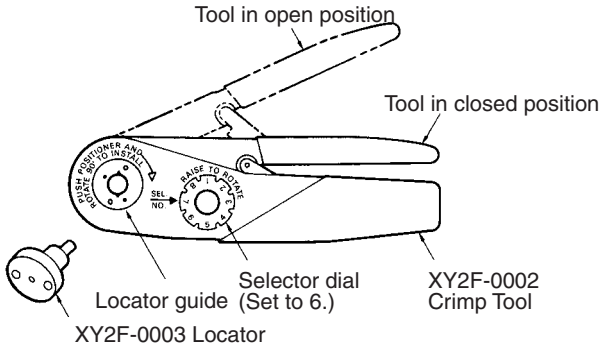
Crimp Tool

XY2F-0002



Use the Crimp Tool to crimp a cable core to the XS2U Crimping Pin used with the XS2C or XS2G Crimping Connector.

Note: The XY2F-0002 Crimp Tool is DMC's AFM8 (M22520/2-01). Mount the XY2F-0003 Locator (sold separately) to the locator guide of the Crimp Tool with a screw provided with the XY2F-0003 Locator.

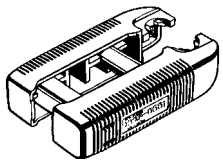


Locator

XY2F-0003

Pin-block Extraction Tool

XY2F-0001



Use this tool to extract a Pin Block from the covers in order to make wiring changes or corrections after the cover has been mounted to the pin block for Connector Assemblies (XS2C/XS2G, soldering/crimping).

■ Assembly Procedure for XS2C/XS2G Connector Assemblies

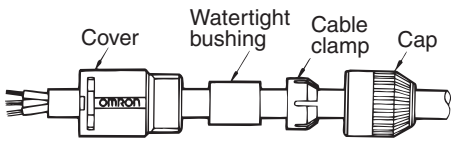
Connector and Cable External Diameters

- Connectors for 6-, 4-, and 3-mm-diameter Cables (i.e., Cables that are 5 to 6, 4 to 5, and 3 to 4 mm in diameter respectively) are available. When assembling a Connector used with a cable, make sure that the external diameter of the Connector is suited to that of the cable.
- Connectors for 6-mm-diameter Cables use white cable clamps. Connectors for 4 and 3-mm-diameter Cables use black cable clamps.
  A watertight bushing for 6-mm-diameter Cable has no stripe, that for 4-mm-diameter Cable has a single stripe, and that for 3-mm-diameter Cable has two stripes.

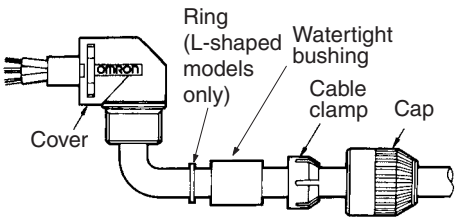
Note: When connecting a commercially available cable to a connector assembly, use a cable with an outside diameter of 3 to 6 mm and core sizes of 0.18 to 0.75 mm^2 for crimping connectors and 0.5 mm^2 maximum for soldering connectors.

Component Insertion

Straight Connectors



L-shaped Connectors



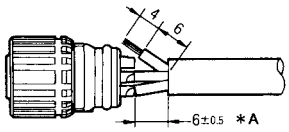
Note: A ring is not required for Screw-on Connectors.

- As shown in the above illustration, connect the above components to the Cable with its end processed.

Note: The diagram shows the cover for Soldering or Crimping Connectors. The shape of the cover is different for Screw-on Connectors.

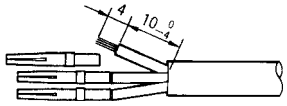
Wiring (Processing Cable Ends)

Soldering Connectors



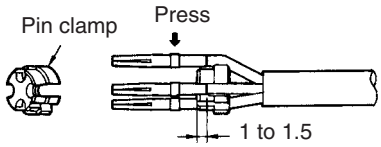
- Strip 10 mm of the Cable sheath and 4 mm of each core.
- Before soldering cores and solder cup pins together, solder-coat each of them.
- The following conditions are recommended for soldering each solder cup pin.
  Soldering iron: 30 to 60 W
  Soldering temperature: 280°C to 340°C
  Soldering period: 3 s max.
- The length marked *A should be 6.5 mm max., otherwise the proper degree of protection of the connector will not be maintained.

Crimping Connectors



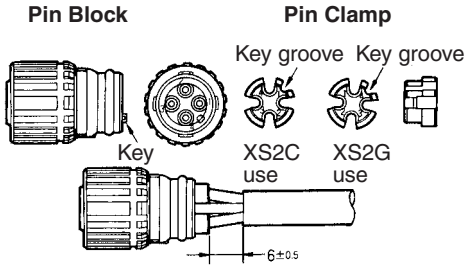
- Strip 14 mm of the Cable sheath and 4 mm of each core.
- Make sure that each core is not damaged and its end strands are not spread out.
- Mount the XY2F-0003 Locator to DMC's AFM8 (M25520/2-01) Crimping Tool, both of which are sold separately, and set the selector dial of the Crimping Tool to 6 for the XS2U-□□21 and to 7 for the XS2U-□□22.
- After mounting the crimping pins to the Locator, fully insert the cores to the crimping pins.
- Squeeze the handle of the Crimp Tool to press-fit the cores to the crimping pins.
  (Squeeze the handle firmly until the handle automatically returns to the release position.)

Crimping Cable Cores to Pin Clamp



- After press-fitting the cores to the pins, insert the pins into the pin clamp as shown in the illustration. Then make sure that the lead colors correspond to the pin clamp numbers that are identical to the connector pin numbers.

Mounting Pin Clamp to Pin Block

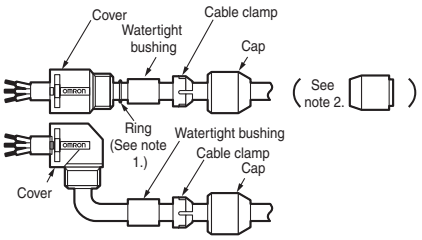


- Tentatively insert the pins to the pin block holes so that the key on the pin block will coincide with the key groove on the pin clamp. Then insert the cable along with the pin clamp.

Screw-on Connectors

Inserting Parts

Confirm that you have all of the required parts.



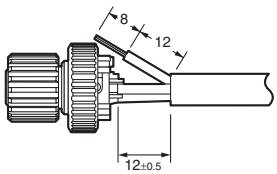
Insulation caps and insulation tubes are included with 5-pole Connectors (XS2C-D5S□ and XS2G-D5S□).

Note: 1. Rings are not required with 7-mm and 8-mm cables.

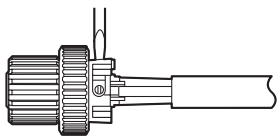
2. Insert the waterproof bushing for 7-mm and 8-mm cables in the direction shown in the diagram.

Cable End Processing

Four-pole Connectors



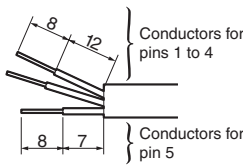
- Loosen the screws on pins 1 to 4 and insert the cores according to the pin numbers.



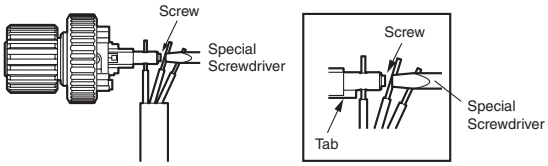
- Use the special Screwdriver (XW4Z-00B) and tighten the screws securely so that the cores do not pull out (tightening torque: 0.15 to 0.2 N·m).

Five-pole Connectors

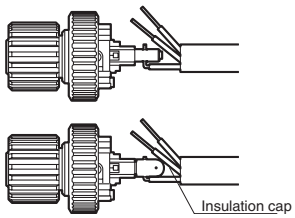
- Strip the cable sheath for a total of 15 mm and strip the core covering for 8 mm for the core to connect to pin 5.



- Connect the core to pin 5 (in the center) first.
- Insert the core from the side of the hold with the tab and tighten the screw securely (tightening torque: 0.15 to 0.2 N·m), and then cut off the excess wire with wire cutters.



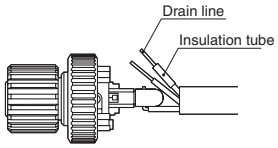
- Bend the cable as shown below, attached the enclosed insulation cap, and then strip the other cores.



- Connect the cores to pins 1 to 4.

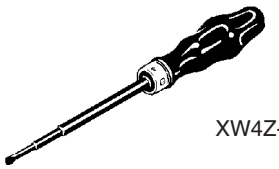
Connecting Shielded Cables to Five-pole Connectors

- Place the insulation tub on the drain line of the shield and connect ti to the terminal.
- Tighten the screw and then check visually to see if there is insulation between the cores.



- Connect the cores to pins 1 to 4.

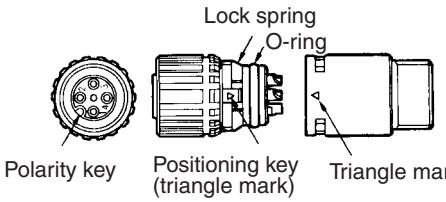
Note: When tightening the screws, use the dedicated XW4Z-00B Screwdriver that matches with the screw-slot dimensions.



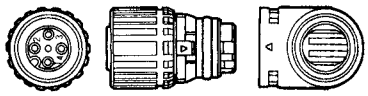
XW4Z-00B Screwdriver

Inserting Pin Block

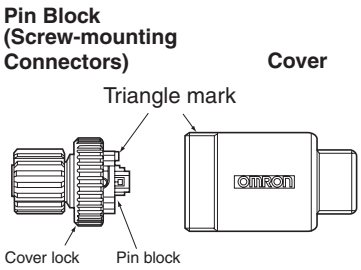
Pin Block (Soldering Model) **Cover (Straight Model)**



(Crimping Model) **(L-shaped Model)**



- Mount the cover to the pin block so that the triangle mark on the pin block will coincide with the triangle mark on the cover.
- If the cover is used for an L-shaped model, the relationship between the position of the polarity key on the engaged side and cable connection direction will be determined by the direction in which the positioning key is inserted into the cover, which can be rotated by 90°.
- Fully insert the positioning key until the positioning key is hidden by the casing.

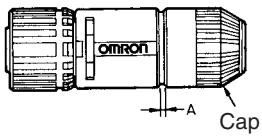


- Align the triangular marks on the pin block and cover and insert the pin block into the cover.
- Press them together firmly (0.39 to 0.49 N·m) until the pin block does not come out of the cover.

Mounting Cap

- After mounting the cover to the pin block and the cover snaps into place, tighten the cap securely by hand within a torque of 0.39 and 0.49 N·m.

Note: If the cap is not tighten securely enough, the degree of protection (IP67) may not be maintained or vibration may cause the cap to become loose. Do not tighten the cap with pliers or similar tools; they may damage the cap.



- After fully tightening the cap, length A should be approximately one of the following according to the cable external diameter and the Connector model.

Connector	Cable external diameter (mm)			
	6 mm	5 mm	4 mm	3 mm
For 6-mm-dia. cable	1	0	---	---
For 4-mm-dia. cable	---	2	1	---
For 3-mm-dia. cable	---	---	2	1

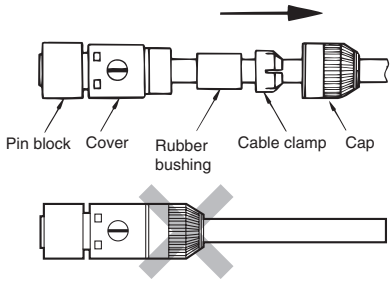
After Assembly

- Confirm the insulation between cores after completing assembly.

■ Extraction Procedure

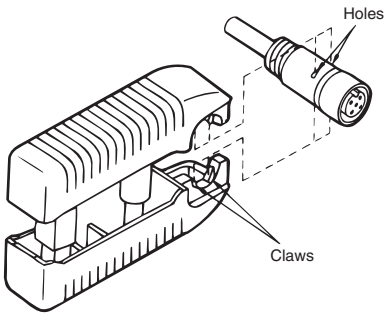
Disconnecting Components

- Disconnect all components on the cap side from the cover.

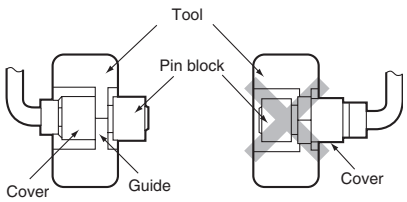


Extracting Pin Block

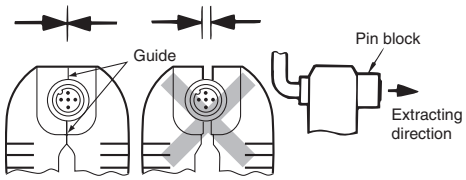
- Insert the claws of the Tool into the four holes of the cover.



- Make sure that the pin block is outside the Tool.



- Press the Tool so that the guides of the Tool are in close contact. Then pull the pin block straight.



⚠ Caution

The pin block must not be extracted from the same Connector more than 3 times, otherwise the proper degree of protection of the pin block or Connector will not be maintained.

■ Precautions

Refer to *Correct Use* for precautions for individual products.

Correct Use

Mating

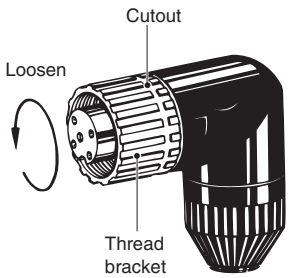
- XS2 and XS3 Connectors will not mate with each other.
- When using Sensors with Connectors or Limit Switches, use the Sensor I/O Connectors specified in the catalog.

Tightening Cap (Connector Assemblies)

- Do not use pliers to tighten caps, otherwise the caps may be damaged. Be sure to tighten each cap by hand within a torque range between 0.39 and 0.49 N·m.
- If caps are not tightened securely, the Connectors may not maintain their proper degree of protection (i.e., IP67) or the caps may become loose due to vibration.

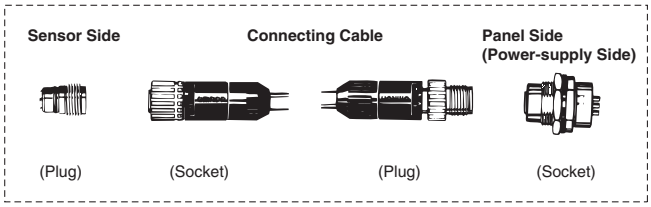
Connector Connection and Disconnection

- Always turn OFF the power supply before connecting or disconnecting connectors.
- When connecting or disconnecting Connectors, be sure to hold the Connectors by hand. Do not hold the cable part when disconnecting Connectors.
- Do not touch the mating surfaces with wet hands. Remove an water on the Connectors or surrounding area before connecting or disconnecting Connectors. Water can cause internal shorts or insulation faults.
- Do not allow pieces of metal or powder to enter the mating sections.
- Connectors mating with sockets must be fully inserted into the sockets. Tighten the thread brackets carefully so that the threads will not be damaged.
- Fully tighten thread brackets within a torque range between 0.39 and 0.49 N·m and be sure that the threads of the opposite parts are hidden by the thread brackets.
- When disconnecting Connectors, be sure to loosen the thread brackets first. Do not loosen the caps.
- Thread brackets must be loosened in the cutout direction.



Connector Arrangement

- For safety, when constructing a connection system between a Sensor and panel with a connector, make sure that the connector plug is on the Sensor side and the connector socket is on the panel side (i.e., the female pins are located on the power-supply side).



Recommended Cables

- When connecting a commercially available cable to a connector assembly, use a cable with an outside diameter of 3 to 6 mm and core sizes of 0.18 to 0.75 mm^2 for crimping connectors and 0.5 mm^2 maximum for soldering connectors.

Degree of Protection

- Do not impose external force continuously on the joints of pin blocks and covers, otherwise the Connectors may not keep its proper degree of protection (i.e., IP67).
- The degree of protection of connectors (IP67) is not for a fully watertight structure. Do not use them underwater.
- The Connectors are not oil-resistant. Do not use them where they would be subject to oil.
- When using a Connector in a location subject to constant vibration or shock, secure them near the mating sections. The Connectors may become loose or fall off, and the degree of protection (IP67) may be lost.
- Connectors are of resin mold construction. Do not impose excessive force on them.

Storage

Do not store Connectors for long periods of time in the following locations.

- Locations subject to dust or high humidity
- Locations subject to ammonia gas or sulfide gas

Changes in Standards Accompanying International Standardization

■ Changes in Standards for Sensor I/O Connectors Accompanying International Standardization

Changes in standards are progressing to enable international standardization of control components in line with movements in trade friction and EC unification. In Japan as well, domestic standards and regulations are being revised in the face of international standardization. OMRON is working positively to achieve internationalization of standards, and the pin number and lead wire colors of one-piece Sensor I/O Connectors have been changed as described below. We know that this will create extra work for our customers, but we ask for your understanding and cooperation in making the required changes.

Changes in Pin Numbers and Lead Colors for XS2 Sensor I/O Connectors

- Accompany the establishment of IEC standards, JIS standards for proximity and photoelectric sensors (JIS C4524 (High-frequency Proximity Switches) and JIS C4525 (Photoelectric Switches) were revised in 1992, resulting in changes to the lead wire color standards. Also, the standards of the Nippon Electric Control Equipment Industries Association (NECA) were also revised in line with JIS standards. Following these changes, OMRON has changed the cable pin numbers and lead wire colors for XS2 Sensor I/O Connectors.

Excerpt from General Rules on External Lead Colors for Control Devices (NECA 0402)

3.5 As a rule, the contact numbers and lead wire colors of connectors for FA sensors shall combine the lead wire colors given in *Table 6* and the contact number meanings given in *Table 7* for non-contact detection switches and limit switches with connectors.

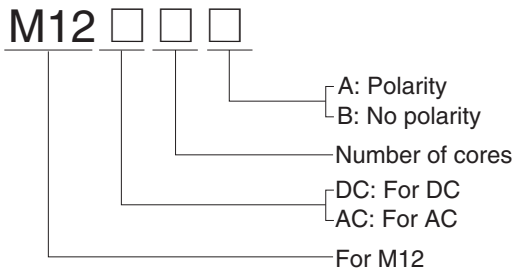
Table 6 Lead Wire Colors, M12

Applicable cable outer diameter		Contact number			
		1	2	3	4
AC	**M12AC2**	---	---	Brown	Blue
	M12AC4	Brown	White	Blue	Black
DC	**M12DC2A**	Brown	---	---	Blue
	M12DC2B	---	---	Black	White
	M12DC3	Brown	---	Blue	Black
	M12DC4	Brown	White	Blue	Black

Note: 1. The above is only an except from *Table 6*.

2. Production of products using the previous colors was terminated in September 1994.

Lead Wire Color Model Number Standards

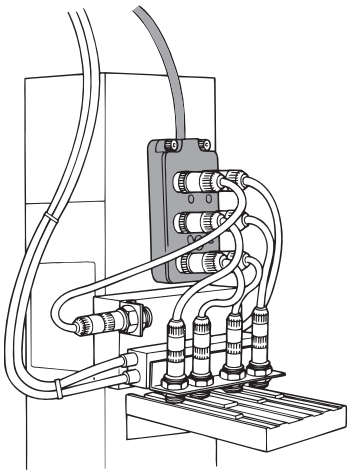


OMRON

Connector Terminal Boxes | XW3B

Series Includes New Lightweight, Low-profile Connector Terminal Boxes for Use Outside of Control Boxes to Centralize Sensor I/O Connectors with Reduced Labor and Greater Environmental Resistance.

- Tough model with a significantly lower profile satisfies IP67.
- Available for Photoelectric Sensors, Proximity Sensors, and Limit Switches with Sensor I/O Connectors (M12).
- Incorporates power and operation indicators.
- Uses a single mounting method regardless of the number of ports, which ensures easy system expansion.



■ Materials and Finish

Item	Part name	Materials and finish
Connectors	Anchor	Brass/nickel plated
	Contacts	Brass/nickel base, 0.4-μm gold plating
Cable	Cable	Sheath color: gray Core size: AWG18/AWG22 (See note.)
Case	Case	PBT resin (UL94V-0)/light gray
	Bushing	Rubber
	PCB	Glass-epoxy board
	Seal resin	Urethane resin

Note: The positive power supply, negative power supply, and ground lines are AWG18. Signal lines are AWG22.

■ Ratings and Characteristics

Rated current	4 A/port (signal lines) 12 A/box (power lines)
Rated voltage	10 to 30 VDC
Contact resistance	40 MΩ max. (with 100 mA max., 20 mV max.) (See note 1.)
Insulation resistance	100 MΩ min. (at 500 VDC)
Dielectric strength	500 VAC for 1 min (leakage current: 1 mA max.) (See note 2.)
Degree of protection	IP67 (IEC529)
Cable retention force	98 N/15 s
Insertion tolerance	200 times
Operating temperature	−25 to 70°C

Note: **1.** The contact resistance of the Connector.
2. The dielectric strength of the Connector.

■ Compatible Connectors

XS2G	Connector Plug Assemblies (crimping, soldering, or screw-on)
XS2W	Connectors on cable ends (Sockets or Plugs)
XS2H	Connectors on one cable end (Plugs)

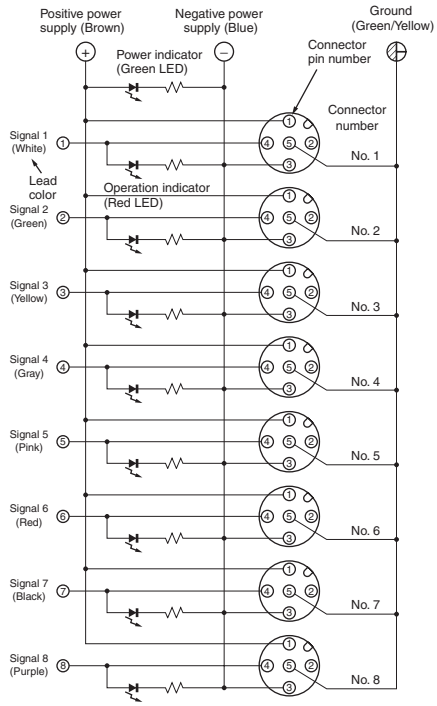
XW3B-P□53-G11 for 3-wire DC PNP, 2-wire DC (with polarity 1-4), and Actuator (3-4)

3-Wire PNP



Note: 1. The above wiring diagrams are for eight-port use.

2. Figures in parentheses indicate lead colors.

3. The expression "white/red" means white and red stripes.

4. Here 1-4 and 3-4 are pin numbers.

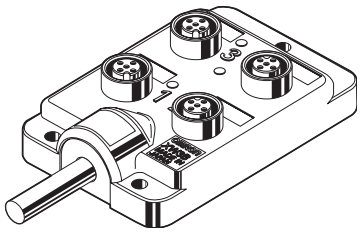
5. Contact numbers 5 through 8 in the above diagrams do not exist on Terminal Boxes with four inputs. The lead colors for signals 1 through 4, power supply, and ground are the same.

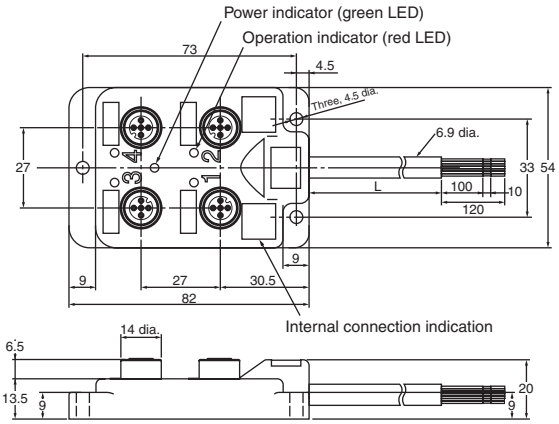
6. Contact numbers 7 and 8 in the above diagrams do not exist on Terminal Boxes with six inputs. The lead colors for signals 1 through 6, power supply, and ground are the same.

Note: Refer to pages 36 to 37 for input devices that can be connected through the above connectors.

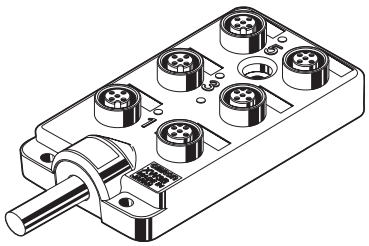
■ Dimensions

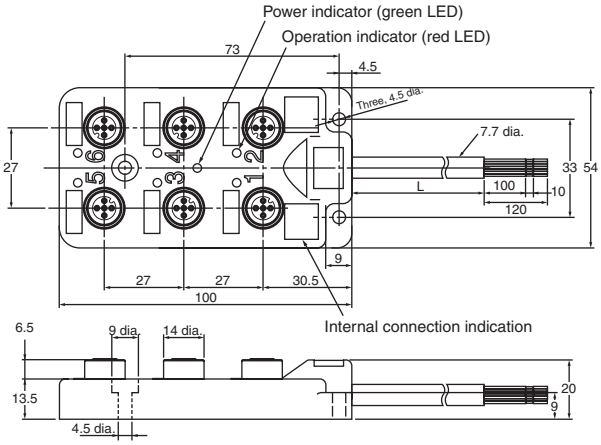
XW3B-P45□-G11 (Four Input Ports)



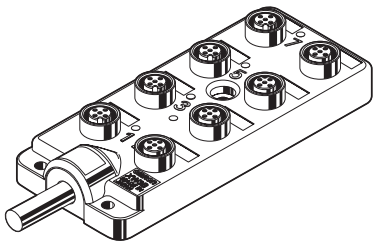


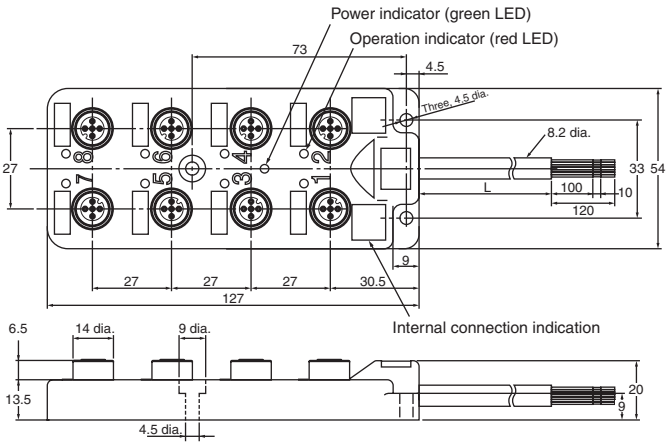
XW3B-P65□-G11 (Six Input Ports)



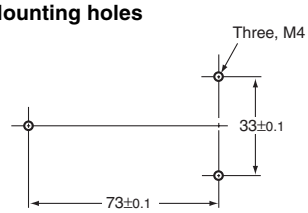


XW3B-P85□-G11 (Eight Input Ports)





Mounting holes



Note: Mounting hole dimensions are always the same regardless of the number of ports.

3. See the models above for components that are compatible with Sensor I/O Connectors.

■ Precautions

Correct Use

Connector Connection or Disconnection

- Before using a Sensor or Limit Switch, check this catalog and be sure that the Sensor or Limit Switch can be connected.
- Be sure to turn OFF the power supplied to the XW3A before Connector connection or disconnection.
- Do not touch the engaged side of any Connector with a wet hand.
- If a Connector is wet with water, wipe the Connector and be sure that the connector is completely dry.
- Be sure that there is no metal plate or power on the engaged side of any Connector.

Cable Connection

- Be sure to wire the cable correctly according to the wiring diagram so that the blue wire will be connected to the negative power supply terminal and the brown wire will be connected to the positive power supply terminal.
- If there is any wiring mistake, the load will not operate or the operation indicator will not light.
- Be sure to connect a load to the signal lines to operate the Sensor.

Applicable Connectors

- Applicable Connectors are the XS2G (assembly type), XS2H (monoblock type), and XS2W (monoblock type).
- After a Connector is engaged, tighten the Connector securely with a mounting bracket.
- Be sure to put the XS2Z-12 Waterproof Cover or XS2Z-15 Dust Cover on any Connector that is not used.

Power Supply and Operation Indicators

- When power is supplied, the green power indicator will be lit. When the Sensors and Actuators are operating, the corresponding red operation indicators will be lit.
- Only DC Sensors and Actuators can be connected to the XW3B. Do not connect AC Sensors or Actuators. Connector Terminal Boxes are internally wired with 2 or 3 wires. The type is marked on the case.

3-WIRE NPN	3-WIRE PNP	2-WIRE

OMRON

Sensor I/O Connectors (M8/S8) | XS3

More Compact than the Popular XS2 Sensor I/O Connectors. Saves Wiring Effort and Ideal for Compact Machines and Installations

- Water-resistive, compact connector meets IP67 requirements.
- Conventional M8 screw-mounting models are available along with S8 snap-in models that connect and disconnect with one touch.
- Greatly saves installation space, such as terminal box or conduit space.
- Ideal for a wide variety of FA and OA applications.
- Using connectors for wiring ensures ease of equipment maintenance and reduces downtime required for equipment maintenance.
- Connectors on cable ends require no harness work.

■ Specifications

Rated current	1 A
Rated voltage	125 VDC
Contact resistance	40 MΩ max. (20 mV max., 10 mA max.) (See note 1.)
Insulation resistance	1,000 MΩ min. (at 500 VDC)
Dielectric strength	1,000 VAC for 1 min (leakage current: 1 mA max.) (See note 2.)
Degree of protection	IP67 (IEC529)
Insertion tolerance	200 times
Cable tensile strength	50 N/15 s)
Ambient temperature	Operating: – 25°C to 70°C

Note: **1.** The contact resistance of the connector.
2. The dielectric strength of the connector.

■ Materials and Finish

Pin Block	PBT resin/light gray or black
Contacts	Brass/nickel base, 0.4-μm gold plating
Thread bracket (M8) Shell (S8)	Brass/nickel plated
Cover	Thermoplastic elastomer/black
O-ring	Rubber

		XS3H	S8 plug
XS3Z-15	Polyvinyl chloride/red	XS3F	M8 socket

■ Precautions

Refer to *Correct Use* for precautions for individual products.

Correct Use

Connections

- The XS3 and XS2 Sensor I/O Connectors cannot be connected to each other.
- When using Sensors with Connectors or Limit Switches, use the Sensor I/O Connectors specified in the catalog.
- Do not connect M8 screw models and S8 snap-in models together, otherwise the proper degree of protection of the Connectors will not be maintained.

Connector Connection and Disconnection

- Before connecting or disconnecting Connectors, make sure that no power is being supplied to the Connectors.
- When connecting or disconnecting Connectors, be sure to hold the Connectors by hand.
- Do not touch the engagement side of any Connector with wet hands. If there is any water on the Connector or near the Connector, be sure to wipe off the water before connecting or disconnecting the Connector, otherwise the Connector may short-circuit internally or not ensure good insulation.
- Make sure that engagement side of any Connector is free of metal dust or power.
- Do not use pliers to tighten mounting the thread bracket, otherwise the thread bracket may be damaged. Be sure to tighten each thread bracket by hand within a torque of 0.3 and 0.4 N·m. If the thread bracket is not tightened securely, the Connector may not maintain its proper degree of protection or the thread bracket may fall off due to vibration.
- Fully insert S8 snap-in models until the Connectors are hidden by the metal casing of the opposite parts, otherwise the Connectors will not maintain their proper degree of protection or the thread brackets may drop off due to vibration.

Cable Wire Color

- The M8/S8 Sensor I/O Connectors use the following lead wire colors.

Model		Pin No.			
		1	2	3	4
DC	8-mm-dia. DC4	Brown	White	Blue	Black

Degree of Protection

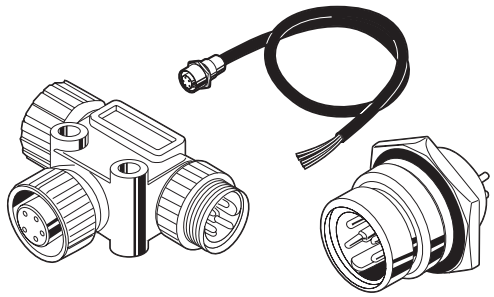
- Do not impose external force continuously on the joints of pin blocks and covers, otherwise the Connectors may not keep its proper degree of protection (i.e., IP67).
- Connectors are not fully watertight. Do not use them underwater.
- The Connectors are not oil-resistant. Do not use them where they would be subject to oil.
- If Connectors are used in places with vibration or shock, secure the engaged side of each Connector, otherwise the Connectors may be disconnected or fail to maintain their proper degree of protection.
- Connectors are of resin mold construction. Do not impose excessive force on them.

Storage

Do not store Connectors for long periods of time in the following locations

- Locations subject to dust or high humidity
- Locations subject to ammonia gas or sulfide gas

- Four-pin Connectors ideal for power supply lines.
- Complies with IP67.
- Product line includes T-branch Connectors and cables with Connectors.



■ Ratings and Characteristics

Item	XS4□-D421-1□□-A Cables with Connector	XS4R-D424-5 T-branch Connectors	XS4P-D421-1C5-A Panel Mounting Cables	XS4M-D421-1 Panel Mounting Cables
Rated current	10 A			
Rated voltage	125 VDC			
Contact resistance (See note 1.)	30 mΩ max. (at 20 mVDC, 100 mA max.)			
Insulation resistance	1,000 MΩ min. (at 500 VDC)			
Dielectric strength (See note 2.)	1,500 VAC for 1 min (leakage current: 1 mA max.)			
Operating temperature	−20 to 65°C			
Storage temperature	−25 to 70°C			
Enclosure rating	IEC IP67			
Insertion durability	200 times			
Cable holding strength	98 N/15 s	---	98 N/15 s	---
Vibration	No break in current for simple harmonic motion (10 to 500 Hz, 1.52-mm amplitude or 100 m/s^2 whichever has the smallest amplitude) for more than 1 μs min.			

Note: **1.** The contact resistance of the Connector.

2. The dielectric strength of the Connector.

3. The rated current between heavy gauge wires is 8 A.

■ Materials and Finish

		XS4□ (4-pin Type for Power Supplies)
Connector	Contact block	Polyester elastomer (UL94V-0)/light gray
	Contact	Brass/1.5-μm nickel base, 0.4-μm gold plating
	Anchor	Copper/nickel plated
	Body (See note.)	Brass/nickel plated
	Cover	Polyester elastomer (UL94V-0)/black
	O ring	Rubber
Cable	Model (manufacturer)	UL STO cable (Shinagawa Densen) or the equivalent
	Cores	AWG16 × 4 cores (black, white, red, and green)
	Diameter	Approximately 11 dia.
	Sheath color	Black

Note: Only panel-mounted bodies are used.

■ Precautions

Correct Use

Handling

- Do not connect or disconnect Connectors with the power turned ON.
- Hold the Connector when connecting or disconnecting Connectors.
- Never pull on the cable to disconnect a Connector.
- Before mating Connectors, insert the matable parts fully. Use a torque of 0.7 to 0.8 N·m to tighten the Anchor, and do so carefully to prevent damage to the threads.
  Do not use pliers or other tools because they may damage the Anchor. Anchors that are not properly tightened cannot maintain the enclosure rating and may become loose with vibration.
- The body is made of molded resin. Do not step on it or place heavy objects on top of it.

Enclosure Rating

- The IP67 enclosure rating is not completely waterproof. Do not use the product in locations where it will be continually under water.

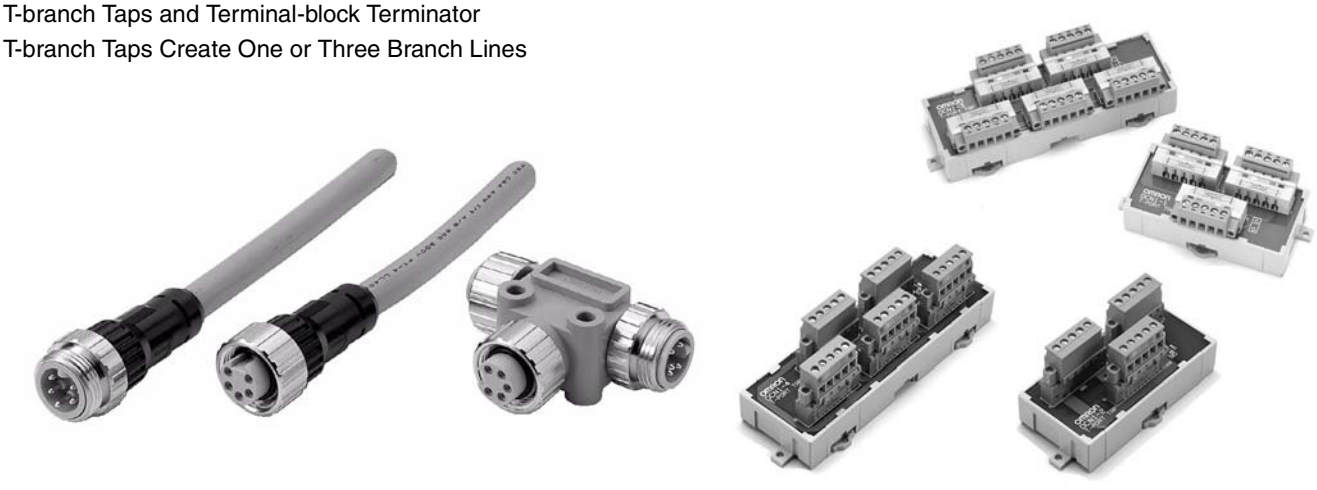
Storage

Observe the following long-term storage precautions.

1. Make sure the storage location is dust- and moisture-proof.
2. Do not store near locations generating ammonia gas, sulfurized gas, or other harmful gases.

Peripheral Devices for DeviceNet Communications

- T-branch Taps and Terminal-block Terminator
- T-branch Taps Create One or Three Branch Lines



■ Ordering Information

General-purpose Models

Product	Appearance	Model	Specification	
T-branch Tap for 1 branch line		DCN1-1NC	Cable wiring direction: Toward top Cable lock direction: From top Connector screw direction: From top	Provided with 3 parallel connectors with clamps (XW4G-05C1-H1-D), standard terminating resistor
		DCN1-1C	Cable wiring direction: Toward side Cable screw direction: From top Connector screw direction: From side	Provided with 3 parallel connectors with screws (XW4B-05C1-H1-D), standard terminating resistor

■ Specifications

General-purpose Models (T-branch Taps)

Ratings/Characteristics

Rated current	Between main lines: 8 A (power supply line) and 2 A (signal line) Between main and branch lines: 3 A (power supply line) and 1 A (signal line)
Insulation resistance	100 MΩ min. (at 500 VDC)
Dielectric strength	500 VAC for 1 min, leakage current: 1 mA max.
Ambient temperature	Operating: 0°C to 55°C

Materials

Item	Component	Materials
Unit	Main and Expansion Units	PBT resin with glass (UL14V-0)/gray
	DIN track lock	POM resin/yellow
Terminal block connector (See note.)	Housing	PA66 resin (UL94V-0)
	Contact	Phosphor bronze/gold plated
PCB		Glass epoxy resin

Note: The terminal block connector is a product of Phoenix Contact.

Environment-resistive Models (Thin Wire Communications Connectors)

Ratings/Characteristics

Item	DCA1-5CN□□□1 Connectors with Cables	DCN2-1 T-branch Connector	XS2□-D5S7 Assembling-type Connector	DRS2-□ Connectors with Terminating Resistor
Rated current	3 A			
Rated voltage	125 VDC			
Contact resistance (connector)	40 mΩ max. (at 20 mVDC max. and 100 mA max.)			
Insulation resistance	1,000 MΩ min. (at 500 VDC)			
Dielectric strength (connector)	1,500 VAC for 60 seconds (leakage current: 1 mA max.)			
Ambient temperature range	–20 to 65°C			
Storage temperature range	–25 to 70°C			
Enclosure rating	IEC IP67			
Insertion durability	200 times			
Cable strength	98 N for 15 s	---		
Vibration resistance	No current interruptions of more than 1 μm while performing simple vibrations at either 10 to 500 Hz with 1.52-mm full amplitude or at acceleration 100 m/s^2, whichever is smaller			

Environment-resistive Models (Thick Wire Communications Connectors)

Ratings/Characteristics

Item	DCA2-5CN□□□1 Connectors with Thick Wires	DCA1-5CN□□W5 Connectors with Thick Wires	DCN3-11 T-branch Connector	DCN3-12 T-branch Connector	DRS3-1 Connectors with Terminating Resistor	DCA2-5CNC5P1 Panel Mounting Connector	XS4M-D521-1 Panel Mounting Connector
Rated current	8 A	3 A	8 A	3 A (See note.)	8 A		
Rated voltage	125 VDC						
Contact resistance (connector)	30 mΩ max. (at 20 mVDC max. and 100 mA max.)						
Insulation resistance	1,000 MΩ min. (at 500 VDC)						
Dielectric strength (connector)	1,500 VAC for 60 seconds (leakage current: 1 mA max.)						
Ambient temperature range	–20 to 65°C						
Storage temperature range	–25 to 70°C						
Enclosure rating	IEC IP67						
Insertion durability	200 times						
Cable strength	98 N for 15 s		---			98 N for 15 s	---
Vibration resistance	No current interruptions of more than 1 μm while performing simple vibrations at either 10 to 500 Hz with 1.52-mm full amplitude or at acceleration 100 m/s^2, whichever is smaller						

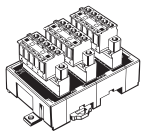
Note: The rated current between thick wires is 8 A.

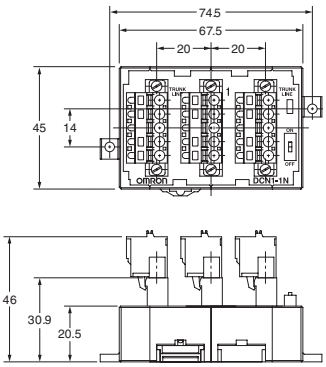
■ Dimensions

Note: All units are in millimeters unless otherwise indicated.

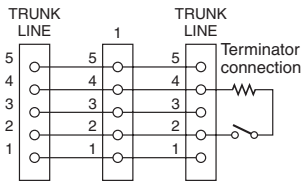
General-purpose Models

DCN1-1NC
T-branch Tap for 1 Branch Line
(With Three Branching Connectors)



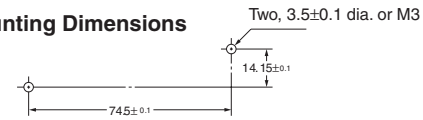


Internal Circuit

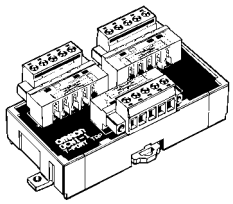


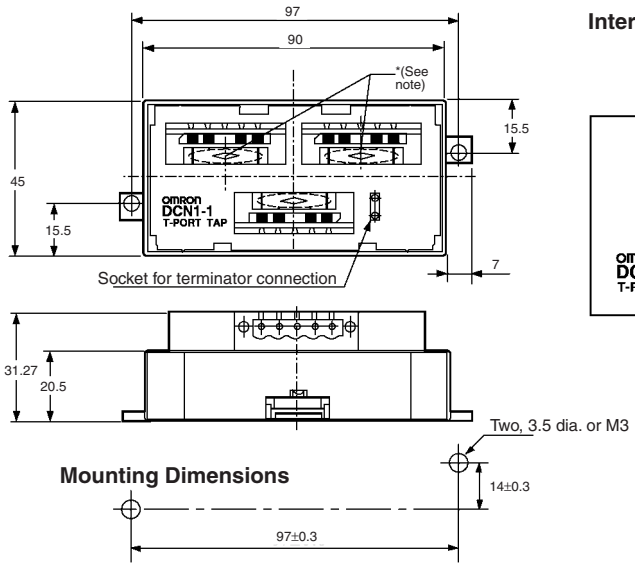
Terminal No.	Name
1	V–
2	CAN-L
3	DRAIN
4	CAN-H
5	V+

Mounting Dimensions

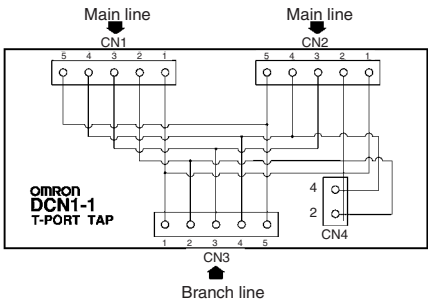


DCN1-1C
T-branch Tap for 1 Branch Line
(With Three Branching Connectors)





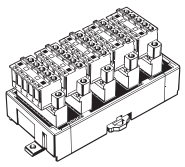
Internal Circuit

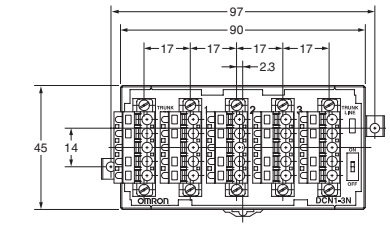


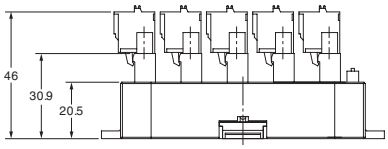
Terminal No.	Name
1	V–
2	CAN-L
3	DRAIN
4	CAN-H
5	V+

Note: When connecting a branch line to the main line, connect the main line to the connector marked with an asterisk because the resistance between the asterisks is minimal.

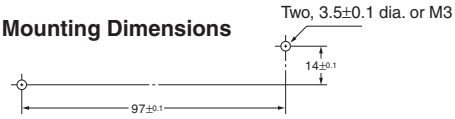
DCN1-3NC
T-branch Tap for 3 Branch Lines
(With Five Branching Connectors)



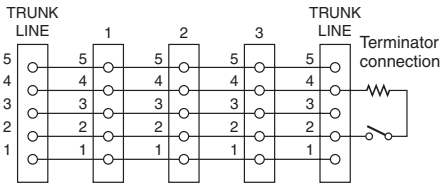




Mounting Dimensions

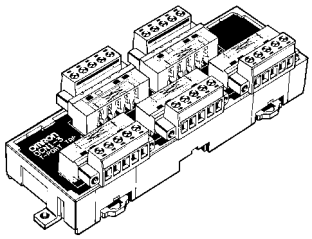


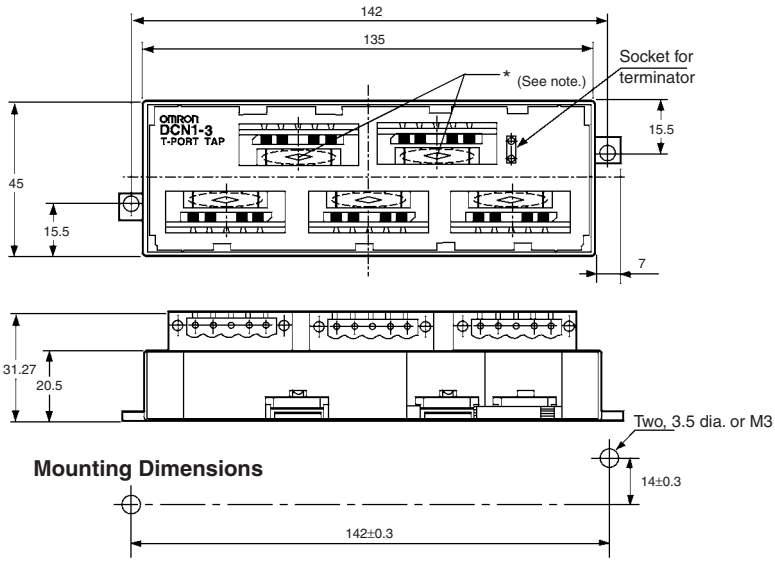
Internal Circuit



Terminal No.	Name
1	V–
2	CAN-L
3	DRAIN
4	CAN-H
5	V+

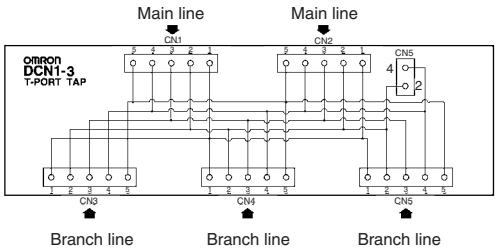
DCN1-3C
T-branch Tap for 3 Branch Lines (With Five Branching Connectors)





Mounting Dimensions

Internal Circuit



Terminal No.	Name
1	V–
2	CAN-L
3	DRAIN
4	CAN-H
5	V+

Note: When connecting a branch line to the main line, connect the main line to the connector marked with an asterisk because the resist ance between the asterisked portion is minimal.
