OMRON

V680 DeviceNet ID Slaves
# V680-HAM42-DRT

CE

V680-series DeviceNet-compatible Slaves for RFID Systems.
Read and Write Up To 58 Bytes.

- V680-series DeviceNet-compatible Slaves for RFID systems.
- Includes a built-in Amplifier, yet has a compact size of 65 × 65 × 65 mm. Compatible with V680-series ID Tags and Antennas.
- Read and write 4, 26, or 58 bytes of data.
- Includes an Access Mode compatible with the V600-HAM42-DRT to enable the use of existing programs.
- Complies with international standards, including CE, UL/CSA, and radio wave regulations. (Radio wave regulation compliance is applicable to Japan, Europe, the U.S.A., and Canada. Radio wave regulation compliance for China and South Korea is pending. Approval for UL/CSA is pending.)

System Configuration

ID Tag	Wireless communications	Read/Write Antenna	Amplifier	Host

ID Tag

1-Kbyte memory
V680-D1KP52MT (8 dia. × 5 mm)
For embedding in metallic or non-metallic surface

1-Kbyte memory
V680-D1KP66MT/V680-D1KP66T
(34 × 34 × 3.5 mm)
For flush mounting on metallic surface

1-Kbyte memory
V680-D1KP66T-SP (96 × 36.5 × 6.5 mm)
For flush mounting on non-metallic surface

2-Kbyte memory
V680-D2KF52M (8 dia. × 5 mm)
For embedding in metallic or non-metallic surface

2-Kbyte memory
V680-D2KF67M/V680-D2KF67
(40 × 40 × 4.5 mm)
For flush mounting on non-metallic surface

8-Kbyte/32-Kbyte memory
V680-D8KF68/-D32KF68
(86 × 54 × 10 mm)
For flush mounting on non-metallic surface

Read/Write Antenna

Cylinder type V680-HS52
-W: Standard cable, waterproof connector
-R: Flexible cable, non-waterproof connector
Cable length: 2m or 12.5 m

Cylinder type V680-HS51
Cable length: 2m

Square type V680-HS63

V680-HS65
-W: Standard cable, waterproof connector
-R: Flexible cable, non-waterproof connector
Cable length: 2m or 12.5 m

Amplifier

V680-HAM42-DRT DeviceNet ID Slave

NEW

Host

Programmable Controller

I/O

Programmable Controller

I/O

Programmable Controller

Note 1. Attach an Antenna to the V680-HAM42-DRT DeviceNet ID Slave to read and write V680 ID Tag data.

2. The DeviceNet ID Slave can communicate with ID Tags that comply with ISO/IEC 18000-3 (ISO/IEC 15693) in addition to V680-series ID Tags. Communications with ID Tags other than V680-series ID Tags, however, may not be stable. Always check compatibility completely before using other ID Tags.

3. Use a V680-HS51/-HS52 Antenna if the V680-D1KP52MT or V680-D2KF52M is to be embedded in metal. Communications cannot be performed if a V680-HS63 Antenna is used in combination with the V680-D1KP52MT or V680-D2KF52M.
Communications cannot be performed if a V680-HS65 Antenna is used in combination with the V680-D1KP52MT or V680-D2KF52M.

OMRON

V680 ID Flag Sensor
V680-HAM91/-HAM81

CE

**Easy Setup! The RFID System can be used just like a regular sensor.**
Read and Write 16 Bits of Data with 1 Unit.
Useful in Applications from Simple Product Identification to Managing Work Progress

• Read or write 16 bits of data (for up to 64,000 IDs) with one Unit despite its compact size.
• Read or write up to 128 bits by using the address shift function.
• With NPN and PNP outputs
• Equipped with a V600-HAM/HAR-compatible Access Mode, allowing use of existing programs.
• Complies with international standards, including CE, UL/CSA, and radio wave regulations. (Radio wave regulation compliance is applicable to Japan, Europe, the U.S.A., and Canada. Radio wave regulation compliance for China and South Korea is pending. Approval for UL/CSA is pending.)

Ratings and Performance

ID Tag (1-Kbyte Memory)

Item Model	V680-D1KP52MT	V680-D1KP66T	V680-D1KP66MT	V680-D1KP66T-SP
Memory capacity	1,000 byte (user area)			
Memory type	EEPROM			
Data backup time (See note 1.)	10 years after writing (85°C max.)			
Memory longevity	100,000 times per block (at 25°C)			
Ambient operating temperature (during transmission)	−25 to 85°C (with no icing)			−25 to 70°C (with no icing)
Ambient operating temperature (not during transmission)	−40 to 125°C (with no icing) Heat resistance: 1,000 thermal cycles each of 30 minutes at −10°C/150°C, High-temperature storage: 1,000 hours at 150°C (See note 2.) 200 thermal cycles each of 30 minutes at −10°C/180°C, High-temperature storage: 200 hours at 180°C (See note 3.)			−40 to 110°C (with no icing)
Ambient storage temperature	−40 to 125°C (with no icing)			−40 to 110°C (with no icing)
Ambient operating humidity	35 to 95%			
Degree of protection	IEC 60529, IP68 In-house standard for antenna oil resistance (former JEM standard equivalent to IP67g) (See note 4.)			IP67
Vibration resistance	10 to 2,000 Hz, 1.5-mm double amplitude at 150 m/s² acceleration with 10 sweeps in X, Y, and Z directions for 15 minutes each			
Shock resistance	500 m/s² in X, Y, and Z directions 3 times each (18 times in total)			
Appearance	8 dia. × 5 mm	34 × 34 × 3.5 mm		95 × 36.5 × 6.5 mm (excluding protrusions)
Materials	Case: PPS resin Filling: Epoxy resin	Molding: PPS resin		External resin: PFA Tag body: PPS resin
Weight	Approx. 0.5 g	Approx. 6 g	Approx. 7.5 g	Approx. 20 g
Metallic compatibility	Yes	No	Yes	No

Note 1. Refer to the *User's Manual* (Cat. No. Z278 or Z279) for data backup time for temperatures of 85°C or higher. If the V680 has been stored at 125°C or higher, write the data again even if the data does not need to be changed.

    2. 150°C heat resistance: The heat resistance has been checked at 150°C for up to 1,000 hours, and thermal shock has been checked through testing 1,000 thermal cycles each of 30 minutes at −10/150°C. (Test samples: 22, defects: 0)

    3. 180°C heat resistance: The heat resistance has been checked at 180°C for up to 200 hours, and thermal shock has been checked through testing 200 thermal cycles each of 30 minutes at −10°C/180°C. (Test samples: 22, defects: 0)

    4. This OMRON in-house standard confirms resistance to cutting and other oils. It is equivalent to the former JEM standard.

    5. For details, refer to the *User's Manual* (Cat. No. Z278 or Z279).

ID Tag (2-Kbyte Memory)

Item Model	V680-D2KF52M	V680-D2KF67	V680-D1KF67M
Memory capacity	2,000 bytes (user area)		
Memory type	FRAM		
Data backup time (See note 1.)	10 years after writing (55°C or less)		
Memory longevity	10 billion times per block. Access frequency (See note 2.): 10 billion times		
Ambient operating temperature	−25 to 85°C (with no icing)		
Ambient storage temperature	−40 to 85°C (with no icing)		
Ambient operating humidity	35 to 95%	35 to 85%	
Degree of protection	IEC 60529, IP67 In-house standard for antenna oil resistance (former JEM standard equivalent to IP67g) (See note 3.)		
Vibration resistance	10 to 2,000 Hz, 1.5-mm double amplitude at 150 m/s² acceleration with 10 sweeps in X, Y, and Z directions for 15 minutes each		
Shock resistance	500 m/s² in X, Y, and Z directions 3 times each (18 times in total)		
Appearance	8 dia. × 5 mm	40 × 40 × 4.5 mm	
Materials	Case: PPS resin Filling: Epoxy resin	Molding: ABS resin Filling: Epoxy resin	
Weight	Approx. 0.5 g	Approx. 6.5 g	Approx. 7 g
Metallic compatibility	Yes	No	Yes

Note 1. Refer to the *User's Manual* (Cat. No. Z278 or Z279) for data backup time for temperatures of 55°C or higher.

    2. The total Read or Write communication frequency is called the access frequency.

    3. This OMRON in-house standard confirms resistance to cutting and other oils. It is equivalent to the former JEM standard.

    4. For details, refer to the *User's Manual* (Cat. No. Z278 or Z279).

OMRON

ID Tag with 8-/32-Kbyte Memory

Item Model	V680-D8KF68	V680-D32KF68
Memory capacity	8,192 bytes (user area)	32,744 bytes (user area)
Memory type	FRAM	
Data backup time	10 years (at 70°C max.) after data is written	
Memory longevity	10 billion times per block at 85°C max. Access frequency (See note): 10 billion times	
Ambient operating temperature	–20 to 85°C (with no icing)	
Ambient storage temperature	–40 to 85°C (with no icing)	
Ambient operating humidity	35 to 85%	
Degree of protection	IEC 60529, IP67 In-house standard for antenna oil resistance (former JEM standard equivalent to IP67g) (See note 2.)	
Vibration resistance	10 to 500 Hz, 1.5-mm double amplitude at 100 m/s^2 acceleration with 10 sweeps in X, Y, and Z directions for 11 minutes each	
Shock resistance	500 m/s^2 in X, Y, and Z directions 3 times each (18 times in total)	
Dimensions	86 × 54 × 10 mm	
Materials	Case: PBT resin Filling: Epoxy resin	
Weight	Approx. 50 g	
Metallic compatibility	No	

Note 1. Refer to the *User's Manual* (Cat. No. Z278 or Z279) for data backup time for temperatures of 70°C or higher.

    2. The total Read or Write communication frequency is called the access frequency.

    3. This OMRON in-house standard confirms resistance to cutting and other oils. It is equivalent to the former JEM standard.

    4. For details, refer to the *User's Manual* (Cat. No. Z278 or Z279).

Cylindrical Read/Write Antenna (Detachable Amplifier Unit Type)

Model Item	V680-HS52-W (Standard Cable, Waterproof Connector)	V680-HS52-R (Flexible Cable, Non-waterproof Connector)	V680-HS51 (Standard Cable, Non-waterproof Connector)
Ambient operating temperature	–10 to 60°C (with no icing)		
Ambient storage temperature	–25 to 75°C (with no icing)		
Ambient operating humidity	35% to 95% (with no condensation)		
Insulation resistance	20 MΩ min. (at 500 VDC) between the cable terminals and the case		
Dielectric strength	1,000 VAC (50/60 Hz) for 1 minute between the cable terminals and the case with a current leakage of 5 mA max.		
Degree of protection	IP67 (IEC60529) In-house standard for antenna oil resistance (former JEM standard equivalent to IP67g) (Read/Write Antenna portion) (See note 1.)	IP67 (IEC60529) In-house standard for antenna oil resistance (former JEM standard equivalent to IP67g) (Read/Write Antenna portion) (See note 2.)	
Vibration resistance	10 to 500 Hz variable vibration, 1.5-mm double amplitude at 100 m/s^2 acceleration, with 10 sweeps in X, Y, and Z directions for 8 minutes each		10 to 2,000 Hz variable vibration, 1.5-mm double amplitude at 150 m/s^2 acceleration, with 10 sweeps in X, Y, and Z directions for 15 minutes each
Shock resistance	500 m/s^2 in X, Y, and Z directions 3 times each (18 times in total)		1,000 m/s^2 in X, Y, and Z directions 3 times each (18 times in total)
Appearance	M22 × 65 mm		M12 × 35 mm
Materials	ABS, brass, epoxy resin filling		
Weight	Approx. 850 g (with 12.5-m cable)		Approx. 55 g (with 2-m cable)

Note 1. The degree of protection for the Connector is IP67/IP65. This OMRON in-house standard confirms resistance to cutting and other oils. It is equivalent to the former JEM standard.

    2. The Connector is not waterproof. This OMRON in-house standard confirms resistance to cutting and other oils. It is equivalent to the former JEM standard.

    3. For details, refer to the *User's Manual* (Cat. No. Z278 or Z279).

V680-HAM42-DRT, V680-HAM91/-HAM81

Square Read/Write Antenna (Detachable Amplifier Unit Type)

Item \ Model	V680-HS63-W (Standard Cable, Waterproof Connector)	V680-HS63-R (Flexible Cable, Non-waterproof Connector)
Ambient operating temperature	−10 to 60°C (with no icing)	
Ambient storage temperature	−25 to 75°C (with no icing)	
Ambient operating humidity	35% to 95% (with no condensation)	
Insulation resistance	20 MΩ min. (at 500 VDC) between the cable terminals and the case	
Dielectric strength	1,000 VAC (50/60 Hz) for 1 minute between the cable terminals and the case with a current leakage of 5 mA max.	
Degree of protection	IP67 (IEC60529) In-house standard for antenna oil resistance (former JEM standard equivalent to IP67g) (Read/Write Antenna portion) (See note 1.)	IP67 (IEC60529) In-house standard for antenna oil resistance (former JEM standard equivalent to IP67g) (Read/Write Antenna portion) (See note 2.)
Vibration resistance	10 to 500 Hz variable vibration, 1.5-mm double amplitude at 100 m/s^2 acceleration, with 10 sweeps in X, Y, and Z directions for 11 minutes each	
Shock resistance	500 m/s^2 in X, Y, and Z directions 3 times each (18 times in total)	
Appearance	40 × 53 × 23 mm	
Materials	ABS, epoxy resin filling	
Weight	Approx. 850 g (with 12.5-m cable)	

Item \ Model	V680-HS65-W (Standard Cable, Waterproof Connector)	V680-HS65-R (Flexible Cable, Non-waterproof Connector)
Ambient operating temperature	−25 to 70°C (with no icing)	
Ambient storage temperature	−40 to 85°C (with no icing)	
Ambient operating humidity	35% to 95% (with no condensation)	
Insulation resistance	20 MΩ min. (at 500 VDC) between the cable terminals and the case	
Dielectric strength	1,000 VAC (50/60 Hz) for 1 minute between the cable terminals and the case with a current leakage of 5 mA max.	
Degree of protection	In-house standard for antenna oil resistance (former JEM standard equivalent to IP67g) (Read/Write Antenna portion) (See note 1.)	In-house standard for antenna oil resistance (former JEM standard equivalent to IP67g) (Read/Write Antenna portion) (See note 2.)
Vibration resistance	10 to 500 Hz variable vibration, 1.5-mm double amplitude at 100 m/s^2 acceleration, with 10 sweeps in X, Y, and Z directions for 11 minutes each	
Shock resistance	500 m/s^2 in X, Y, and Z directions 3 times each (18 times in total)	
Appearance	100 × 100 × 30 mm	
Materials	ABS, epoxy resin filling	
Weight	Approx. 1,100 g (with 12.5-m cable)	

Note 1. The degree of protection for the Connector is IP67/IP65. This OMRON in-house standard confirms resistance to cutting and other oils. It is equivalent to the former JEM standard.

2. The Connector is not waterproof. This OMRON in-house standard confirms resistance to cutting and other oils. It is equivalent to the former JEM standard.

3. For details, refer to the *User's Manual* (Cat. No. Z278 or Z279).

Amplifier (DeviceNet ID Slave)

Item \ Model	V680-HAM42-DRT
Connectable Antennas	One channel (V680-HS□□)
Rated voltage	24 VDC (−15% to 10%) including 10% ripple (p-p)
Power consumption	4 W max. (Current consumption of 200 mA max. at power supply voltage of 24 VDC)
Ambient operating temperature	−10 to 55°C (with no icing)
Ambient storage temperature	−25 to 65°C (with no icing)
Ambient operating humidity	25% to 85% (with no condensation; ambient operating temperature is 40°C max. at humidity of 85%)
Insulation resistance	20 MΩ min. (at 500 VDC) between all terminals excluding the ground terminal and case.
Dielectric strength	1,000 VAC (50/60 Hz) for 1 minute between all terminals excluding the ground terminal and case
Vibration resistance	10 to 150 Hz, 0.2-mm double amplitude at 15 m/s^2 acceleration with 10 sweeps in X, Y and Z directions for 8 minutes each
Shock resistance	150 m/s^2 in X, Y, and Z directions 3 times each (18 times in total)
Appearance	65 × 65 × 65 mm (excluding protrusions)
Degree of protection	IEC 60529, IP20
Materials	Polycarbonate (PC) resin, ABS resin
Weight	Approx. 150 g
Mounting	DIN Track

Note 1. For details, refer to the *User's Manual* (Cat. No. Z278).

2. The number of words allocated in the master depends on the Access Mode. Refer to page 9 for information on *Part Names and Operating Modes*.

OMRON

Amplifier: ID Flag Sensor

Item \ Model	V680-HAM91/V680-HAM81
Rated voltage	24 VDC (−15% to +10%) including 10% ripple (p-p)
Power consumption	3.5 W (24 VDC, 150 mA max. except external I/O line current)
Ambient operating temperature	−10 to 55°C (with no icing)
Ambient storage temperature	−25 to 65°C (with no icing)
Ambient operating humidity	25% to 85% (with no condensation; ambient operating temperature is 40°C max. at humidity of 85%)
Insulation resistance	20 MΩ min. (at 500 VDC) between all terminals (excluding the FG terminal) and the case
Dielectric strength	1,000 VAC (50/60 Hz) applied for 1 minute between all terminals (excluding the FG terminal) and the case
Vibration resistance	10 to 150 Hz, 0.2-mm double amplitude at 15 m/s^2 acceleration with 10 sweeps in X, Y and Z directions for 8 minutes each
Shock resistance	150 m/s^2 in X, Y, and Z directions 3 times each (18 times in total)
Appearance	90 × 30 × 65 mm (excluding protrusions)
Degree of protection	IEC 60529, IP40
Materials	Polycarbonate (PC) resin, ABS resin
Weight	Approx. 130 g
Mounting	DIN Track

Note 1. For details, refer to the *User's Manual* (Cat. No. Z278).

2. The connectors are not water resistant. If there is a possibility that water will be splashed onto the ID Sensor Unit, mount it inside of a control box. Also, be sure to use the V680 as a set with the V680-A60 Interface Cable (sold separately).

I/O Specifications

Item \ Model	V680-HAM91	V680-HAM81
Input specifications	Transistor output Short-circuit current: 3 mA (TYP) (input terminal and 0-V terminal shorted) OFF voltage: 15 to 30 VDC, ON voltage: 0 to 5 VDC Input impedance: 8.2 kΩ Applied voltage: 30 VDC max.	
Output specifications	NPN open-collector output 30 VDC, 20 mA max Residual voltage: 2 V max.	PNP open-collector output 30 VDC, 20 mA max Residual voltage: 2 V max.

Mode	Symbol	Description	Maximum number of bytes accessible in ID Tag	Words allocated in Master Unit
0	4CH	4-byte Access Mode	Read: 4 bytes Write: 4 bytes	IN: 4 words OUT: 4 words (PLC inputs: 64 points, PLC outputs: 64 points)
1	16CH	26-byte Access Mode	Read: 26 bytes Write: 26 bytes	IN: 16 words OUT: 16 words (PLC inputs: 256 points, PLC outputs: 256 points)
2	32CH	58-byte Access Mode	Read: 58 bytes Write: 58 bytes	IN: 32 words OUT: 32 words (PLC inputs: 512 points, PLC outputs: 512 points)
3	SYNC1	V600-compatible Trigger Mode, 100-ms output time	Read: 3 bytes Write: 2 bytes	IN: 2 words OUT: 2 words
4	SYNC2	V600-compatible Trigger Mode, 500-ms output time		
5	AUTO1	V600-compatible Auto Mode, 100-ms output time		
6	AUTO2	V600-compatible Auto Mode, 500-ms output time		
7	TEST	ID Tag Communications Test Mode (Checks standalone operation of ID Slave.)	---	---
8	NOISE	Noise Measurement Mode (Measures the noise around the Antenna.)		
9	---	Setting prohibited		

Note 1. The V600-compatible Trigger and Auto Modes can be used with the same I/O settings and control methods that are used with the V600-HAM42-DRT.

 2. Communications with the host device will be offline while the Communications Test Mode or Noise Measurement Mode is being used.

Commands (4-byte, 26-byte, 58-byte Access Mode)

Reading	READ	Data in the ID Tag memory is read by specifying the memory address and the number of bytes to process. (The number of bytes can be specified using the Access Mode.)
Writing	WRITE	Data is written to the ID Tag by specifying the memory address, number of bytes to process, and the data. (The number of bytes can be specified using the Access Mode.)
	BIT SET	Previously specified bits (i.e., bits that are turned ON) are turned ON in the ID Tag address specified for BIT SET.
	BIT CLEAR	Previously specified bits (i.e., bits that are turned ON) are turned OFF in the ID Tag address specified for BIT CLEAR.
	DATA FILL	The specified continuous memory addresses in the ID Tag are filled with the same data.

V680-HAM42-DRT, V680-HAM91/-HAM81 9

V680-HAM91/-HAM81

Parts Names

I/O connector CN2
Connects to a PLC or other host using an Interface Cable (V680-A60). This connector is not required if data will not be written to ID Tags or the address shift function and noise check function will not be used.

I/O connector CN1
Connects to a PLC or other host using an Interface Cable (V680-A60).

Access Address Mode Setting Switch
Sets the memory address in the ID Tag that will be accessed.
Indicators
Indicates the ID Flag Sensor status and ID Tag communications status.

Mode Setting Switches

Access Mode Setting
Sets the operating mode (SYNC or AUTO) for communications with the ID Tag, and sets the Noise Measurement Mode. (Refer to the following table.)

Output Mode Setting
Sets the Output Mode (10-ms, 50-ms, or 500-ms OFF-delay), and output time setting (10-ms, 50-ms, 500-ms, or Continuous output).

Read Mode Setting
Sets the mode for reading from an ID Tag (DATA READ or VERIFY).

Write Mode Setting
Sets the mode used when writing (16-bit write/8-bit write, BIT SET/BIT CLEAR).

Antenna Connector
Connects to a V680-series Antenna (V680-HS□).

Main Functions

Reading	Data Read	Reads 16 bits of data from the set address in the ID Tag and outputs the data to the data output lines.
	Verify	Compares the code set in advance with the code read from the ID Tag and outputs the match/mismatch result.
	Wire-saving Mode	The wire-saving mode enables reading and writing 16-bit data using one 16-point Input Unit for a PLC or other host device.
Writing	1-byte/2-byte Data Write	Writes the data specified in the data input lines. (The user can select to batch-write 16 bits or 8 bits.)
	Bit Set	Sets specified bits.
	Bit Clear	Clears specifies bits.

Other Functions

Address Shift	Data in an ID Tag is managed in 8-bit units (one page). The number of pages to be read from or written to (the address shift) is specified from external data input lines. A maximum of 16 pages of data (128 bits) can be read or written.
Noise Check	Measures the noise around the Antenna.
Write Protection	Prevents data stored in the ID Tag from being overwritten.

Operating Modes

Function	Mode	Standard modes	V600-HAR91/81 and HAM91/81-compatible modes	V600-HAR92-compatible modes
		AUTO MODE 1 TRIGGER MODE 1	AUTO MODE 2 TRIGGER MODE 2	AUTO MODE 3 TRIGGER MODE 3
Reading	16 bits	●	(●) (See note 1.)	●
	Verification Check	●	●	
	Wire-saving Mode (See note 2.)	●		●
Writing	8 bits (1 byte)	●	●	
	16 bits (2 bytes)	●	●	
	Individual bits (BIT SET or BIT CLEAR)	●	●	
Parity check output (See note 3.)		●		●
Noise check function		●		
Address shift function		●		

Note 1. If an error occurs, the error code will not be output to the data output lines (OD0 to OD15).
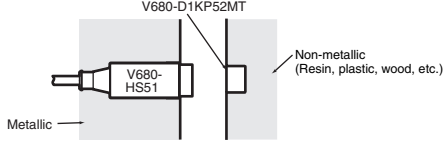

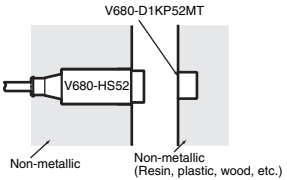

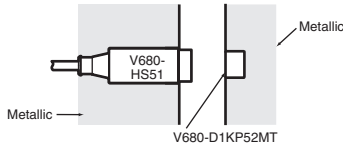

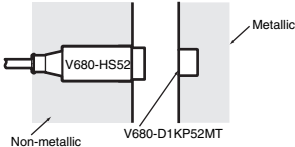

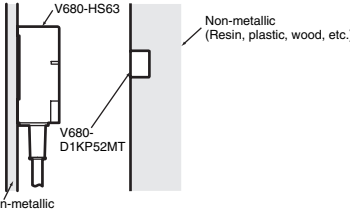

2. If an error occurs, the data output lines will all turn ON.

3. The parity is also output when the error code is output.

4. The V600-compatible modes are for compatibility with the previous V600 Series. Not all functions are supported in these modes.

OMRON

■ Performance Specifications

ID Tag (1-kbyte Memory) Transmission
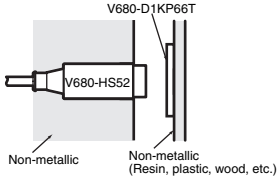

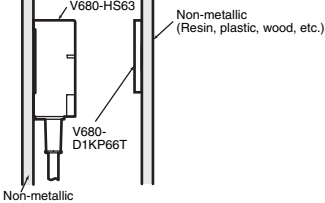

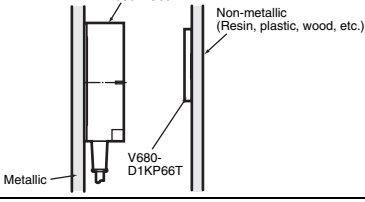

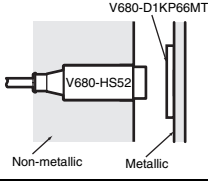

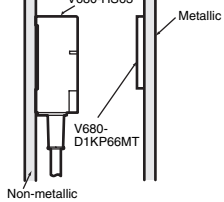

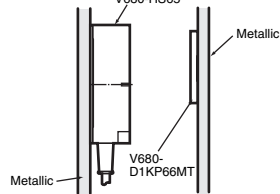

Recommended combination		Function	Transmission distance (unit: mm)	ID Tag and Read/Write Antenna mounting conditions
ID Tag	Read/Write Antenna			
V680-D1KP52MT	V680-HS51	Read distance	0.5 to 6.5 mm (axial deviation ±2)	V680-D1KP52MT, Non-metallic (Resin, plastic, wood, etc.), V680-HS51, Metallic
		Write distance	0.5 to 6.0 mm (axial deviation ±2)	
	V680-HS52	Read distance	0.5 to 9.0 mm (axial deviation ±2)	V680-D1KP52MT, V680-HS52, Non-metallic, Non-metallic (Resin, plastic, wood, etc.)
		Write distance	0.5 to 8.5 mm (axial deviation ±2)	
V680-D1KP52MT (embedded in metallic surface: steel)	V680-HS51	Read distance	0.5 to 3.5 mm (axial deviation ±2)	Metallic, V680-HS51, Metallic, V680-D1KP52MT
		Write distance	0.5 to 3.0 mm (axial deviation ±2)	
	V680-HS52	Read distance	0.5 to 4.5 mm (axial deviation ±2)	Metallic, V680-HS52, Non-metallic, V680-D1KP52MT
		Write distance	0.5 to 4.0 mm (axial deviation ±2)	
V680-D1KP52MT	V680-HS63	Read distance	0.5 to 12.0 mm (axial deviation ±2)	V680-HS63, Non-metallic (Resin, plastic, wood, etc.), V680-D1KP52MT, Non-metallic
		Write distance	0.5 to 9.5 mm (axial deviation ±2)	
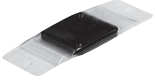

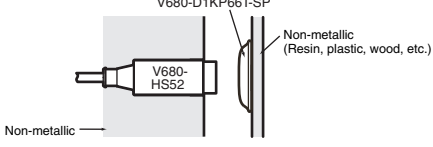

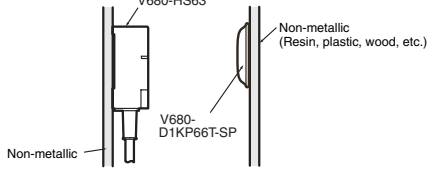

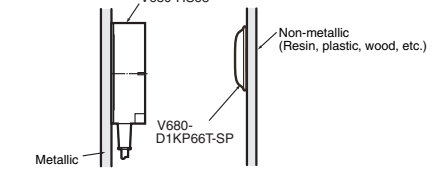

Note 1. When mounting the V680-HS65, be sure to attach the Mounting Brackets at the base of the Antenna.
The enclosed Mounting Brackets do not need to be used, however, if the mounting brackets on the Antenna are metal plates and their dimensions are larger than the dimensions of the Antenna (100 × 100 mm).
For details, refer to the User's Manual (Cat. No. Z248 or Z262).

2. The transmission distance may be reduced if the V680-D1KP66T or V680-D1KP58HT is mounted onto a metallic surface. Refer to the *User's Manual* (V680-D1KP□□: Cat. No. Z262, V680-D1KP58HT: Cat. No. Z221) for details.

V680-HAM42-DRT, V680-HAM91/-HAM81   11
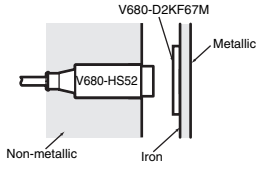

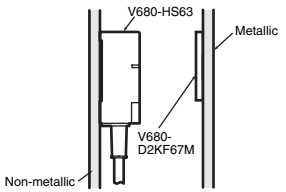

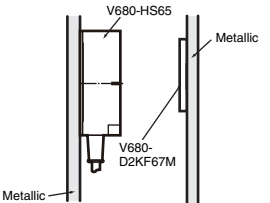

| Recommended combination		Function	Transmission distance (unit: mm)	ID Tag and Read/Write Antenna mounting conditions
ID Tag	Read/Write Antenna			
V680-D1KP66T	V680-HS52	Read distance	1.0 to 17.0 mm (axial deviation ±2) (See note 2.)	
		Write distance	1.0 to 17.0 mm (axial deviation ±2) (See note 2.)	
	V680-HS63	Read distance	5.0 to 30.0 mm (axial deviation ±10) (See note 2.)	
		Write distance	5.0 to 25.0 mm (axial deviation ±10) (See note 2.)	
	V680-HS65	Read distance	5.0 to 47.0 mm (axial deviation ±10) (See note 2.)	
		Write distance	5.0 to 42.0 mm (axial deviation ±10) (See note 2.)	
V680-D1KP66MT (flush-mounted on metallic surface: steel)	V680-HS52	Read distance	1.0 to 16.0 mm (axial deviation ±2)	
		Write distance	1.0 to 14.0 mm (axial deviation ±2)	
	V680-HS63	Read distance	5.0 to 25.0 mm (axial deviation ±10)	
		Write distance	5.0 to 20.0 mm (axial deviation ±10)	
	V680-HS65	Read distance	5.0 to 25.0 mm (axial deviation ±10)	
		Write distance	5.0 to 20.0 mm (axial deviation ±10)	

Recommended combination		Function	Transmission distance (unit: mm)	ID Tag and Read/Write Antenna mounting conditions
ID Tag	Read/Write Antenna			
V680-D1KP66T-SP	V680-HS52	Read distance	1.0 to 15.0 mm (axial deviation ±2)	
		Write distance	1.0 to 15.0 mm (axial deviation ±2)	
	V680-HS63	Read distance	5.0 to 25.0 mm (axial deviation ±10)	
		Write distance	5.0 to 20.0 mm (axial deviation ±10)	
	V680-HS65	Read distance	5.0 to 42.0 mm (axial deviation ±10)	
		Write distance	5.0 to 37.0 mm (axial deviation ±10)	
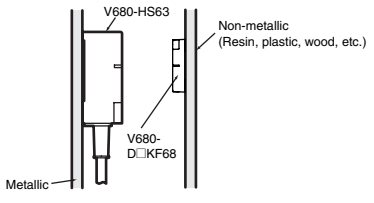

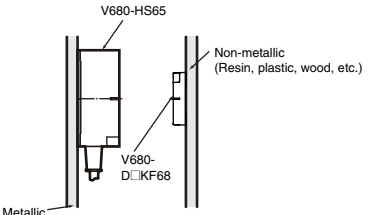

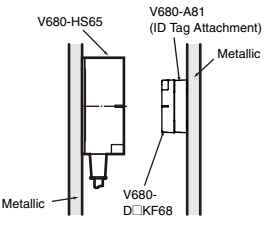

Note 1. When mounting the V680-HS65, be sure to attach the Mounting Brackets at the base of the Antenna.
The enclosed Mounting Brackets do not need to be used, however, if the mounting brackets on the Antenna are metal plates and their dimensions are larger than the dimensions of the Antenna (100 × 100 mm).
For details, refer to the User's Manual (Cat. No. Z248 or Z262).

2. Refer to the *User's Manual* (V680-D1KP□□: Cat. No. Z262, V680-D1KP58HT: Cat. No. Z221) for details.

ID Tag (2-kbyte Memory) Transmission

Recommended combination		Function	Transmission distance (unit: mm)	ID Tag and Read/Write Antenna mounting conditions
ID Tag	Read/Write Antenna			
V680-D2KF52M	V680-HS51	Read distance	0.5 to 5.5 mm (axial deviation ±2)	
		Write distance	0.5 to 5.5 mm (axial deviation ±2)	
	V680-HS52	Read distance	0.5 to 8.0 mm (axial deviation ±2)	
		Write distance	0.5 to 8.0 mm (axial deviation ±2)	
V680-D2KF52M (embedded in metallic surface: steel)	V680-HS51	Read distance	0.5 to 3.5 mm (axial deviation ±2)	
		Write distance	0.5 to 3.5 mm (axial deviation ±2)	
	V680-HS52	Read distance	0.5 to 3.0 mm (axial deviation ±2)	
		Write distance	0.5 to 3.0 mm (axial deviation ±2)	
V680-D2KF52M	V680-HS63	Read distance	0.5 to 9.5 mm (axial deviation ±2)	
		Write distance	0.5 to 9.5 mm (axial deviation ±2)	
V680-D2KF67	V680-HS52	Read distance	1.0 to 17.0 mm (axial deviation ±2) (See note.)	
		Write distance	1.0 to 17.0 mm (axial deviation ±2) (See note.)	
	V680-HS63	Read distance	7.0 to 30.0 mm (axial deviation ±10) (See note.)	
		Write distance	7.0 to 30.0 mm (axial deviation ±10) (See note.)	
	V680-HS65	Read distance	5.0 to 42.0 mm (axial deviation ±10) (See note.)	
		Write distance	5.0 to 42.0 mm (axial deviation ±10) (See note.)	

Recommended combination		Function	Transmission distance (unit: mm)	ID Tag and Read/Write Antenna mounting conditions
ID Tag	Read/Write Antenna			
V680-D2KF67M (flush-mounted on metallic surface: steel)	V680-HS52	Read distance	1.0 to 16.0 mm (axial deviation ±2)	
		Write distance	1.0 to 16.0 mm (axial deviation ±2)	
	V680-HS63	Read distance	6.0 to 25.0 mm (axial deviation ±10)	
		Write distance	6.0 to 25.0 mm (axial deviation ±10)	
	V680-HS65	Read distance	5.0 to 25.0 mm (axial deviation ±10)	
		Write distance	5.0 to 25.0 mm (axial deviation ±10)	

ID Tag (8-/32-Kbyte Memory) Transmission

Recommended combination		Function	Transmission distance (unit: mm)	ID Tag and Read/Write Antenna mounting conditions
ID Tag	Read/Write Antenna			
V680-D8KF68/ -D32KF68	V680-HS63	Read distance	5.0 to 45.0 mm (axial deviation ±10) (See note.)	
		Write distance	5.0 to 45.0 mm (axial deviation ±10) (See note.)	
	V680-HS65	Read distance	5.0 to 75.0 mm (axial deviation ±10) (See note.)	
		Write distance	5.0 to 75.0 mm (axial deviation ±10) (See note.)	
V680-D8KF68/ -D32KF68 (Special attachment provided; flush-mounted on metallic surface: steel)	V680-HS63	Read distance	5.0 to 35.0 mm (axial deviation ±10)	
		Write distance	5.0 to 35.0 mm (axial deviation ±10)	
	V680-HS65	Read distance	5.0 to 55.0 mm (axial deviation ±10)	
		Write distance	5.0 to 55.0 mm (axial deviation ±10)	

Note: When mounting the V680-HS65, be sure to attach the Mounting Brackets at the base of the Antenna.
The enclosed Mounting Brackets do not need to be used, however, if the mounting brackets on the Antenna are metal plates and their dimensions are larger than the dimensions of the Antenna (100 × 100 mm).
For details, refer to the User's Manual (Cat. No. Z248 or Z262).

Note: The transmission distance may be reduced if the V680-D1KP66T or V680-D1KP58HT is mounted onto a metallic surface. Refer to the *User's Manual* (V680-D1KP□□: Cat. No. Z262, V680-D1KP58HT: Cat. No. Z221) for details.

OMRON

V680-HAM91/-HAM81 (ID Flag Sensor)

Model	V680-HAM91/V680-HAM81	
	Read	**Write**
Function (Mode)	Data Read Verify Read	Write BIT SET BIT CLEAR
1-Kb, 2-Kb Memory Tag	43 ms	87 ms
8-Kb, 32-Kb Memory Tag	50 ms	84 ms

$$\text{ID Tag travel speed (i.e., conveyor speed)} = \frac{\text{Travel distance (D) in communications area}}{\text{Communications time (T)}}$$
Calculation Example:

In this example, the V680-D1KP66T and V680-HS63 are combined and read together.
$$\text{ID Tag travel speed (m/min.)} = \frac{50 \text{ (mm)}}{28 \text{ (ms)}} \fallingdotseq 107 \text{ (m/min)}$$

Note 1. The travel speed depends on communications distance Y and axis offset. It is recommended to refer to the communications area diagram and use the part with the widest area.

2. These values are guidelines. Perform testing with the actual device before operation.

3. Processing for communications errors is not included in this formula.

Safety Precautions

⚠ WARNING

Do not use this product as a detection device to protect people. 🚫

Note: This catalog is intended only to help select the appropriate product. Be sure to read the User's Manual for usage precautions prior to using the product.

Precautions for Safe Use

To ensure safety, be sure to follow the following precautions:

1. Do not operate this product in any flammable, explosive, or corrosive gas environment.
2. Do not disassemble, repair, or remodel this product.
3. If any cable has a locking mechanism, be sure to check that it has been locked before using it.
4. The DC power supply must be within the specified rating (24 VDC +10%/−15%).
5. Do not reverse the power supply connection.
6. Do not insert water, wire, etc., into any of the gaps in the case. Doing so may cause fire or electric shock.
7. Make sure that the Unit is provided with sufficient ventilation space.
8. Do not install the Products near any equipment that generates a large amount of heat (such as heaters, transformers, and large-capacity resistors).
9. Turn OFF the Controller or ID Sensor Unit power before attaching or removing the Read/Write Antenna.
10. In the event that the product exhibits any abnormal condition, immediately stop using the system, turn OFF the power, and contact your OMRON sales representative.
11. Dispose of this product as industrial waste.
12. Do not clean the Products with paint thinner, benzene, acetone, or kerosene.
13. If multiple Antennas are mounted near each other, communications performance may decrease due to mutual interference. Refer to the User's Manual (Cat. No. Z278 or Z279) and check to make sure there is no mutual interference between the Antennas.
14. To remove the Unit, catch a tool on the hook and gently remove the Unit.
15. Do not perform wiring incorrectly or short-circuit the load. Doing so may result in rupture or damage from burning.
16. Do not use the product in environments subject to oil.
17. Do not use the product with an AC power supply.

Precautions for Correct Use

Please observe the following precautions to prevent failure to operate, malfunctions, or undesirable effects on product performance.

Installation Site

Install the product at a location where:

- It is not exposed to corrosive gases, dust, metal chips, or salt.
- The ambient operating temperature is within the range stipulated in the specifications.
- There are no sudden variations in temperature (no condensation).
- The ambient operating humidity is within the range stipulated in the specifications.
- No vibration or shock exceeding the values stipulated in the specifications is transmitted directly to the body of the product.
- It is not subject to splashing water, oil, or chemical substances.

Installation

- The product uses the 13.56-MHz frequency band to communicate with ID Tags. Some devices, such as some motors, inverters, and switching power supplies, generate electromagnetic waves (i.e., noise) that can affect communications with ID Tags. If any of these devices are nearby, communications with ID Tags may be affected or ID Tags may be destroyed. If the product is to be used near such devices, check the effects on communications before using the product.
- To minimize the general influence of noise, observe the following precautions:
  1. Ground any metallic material located around this device to 100 Ω or less.
  2. Keep the product away from high voltage and heavy current.
- Always bundle the cables connected to the power supply terminals and the ground terminal and connect the enclosed ferrite core (ZCAT2032-0930 manufactured by TDK) (V680-HAM42-DRT only).
- Do not pull on the cables with excessive strength.
- Do not use products that are not waterproof in misty environments.
- Do not subject the products to chemicals that adversely affect product materials.
- When installing the product, tighten screws to the following torque:
  V680-HS51 Read/Write Antenna: 6 N·m
  V680-HS52 Read/Write Antenna: 40 N·m
  V680-HS63 Read/Write Antenna: 1.2 N·m
  V680-HS65 Read/Write Antenna: 0.7 to 1.2 N·m
- When Read/Write Antennas are mounted side-by-side, mutual interference may reduce the transmission performance. Refer to the *RFID System Amplifier and Antennas/ID Tags User's Manual* to mount them in a way that will prevent mutual interference.

Host Communications (V680-HAM91/-HAM81)

When the Product is started, unstable signals may be output from the host interface.

Begin performing controls with the Product only after it has been started for at least 1 second.

Storage

Store the product at a location where:

- It is not exposed to corrosive gases, dust, metal chips, or salt.
- The ambient storage temperature is within the range stipulated in the specifications.
- There are no sudden variations in temperature (no condensation).
- The ambient storage humidity is within the range stipulated in the specifications.
- No vibration or shock exceeding the values stipulated in the specifications is transmitted directly to the body of the product.
- It is not subject to splashing water, oil, or chemical substances.
Cleaning

Do not use thinner, benzene, acetone, or kerosene for cleaning. Using these substances may dissolve the resin material and the case.

Dimensions

**Note:** All units are in millimeters unless otherwise indicated.
