Sealed Subminiature Basic Switch
D2SW

High-quality Sealed Miniature Basic
Switch Conforming to IP67 (Lead wire type only)

■ Monoblock construction assures high sealing capability and is ideal for dusty places or where water is sprayed.

- A wide operating temperature range of $-40^{\circ} \mathrm{C}$ to $85^{\circ} \mathrm{C}$ is ideal for any operating environment.
■ Ideal for the automobile, agricultural machinery, automatic vending machine, refrigerator, icemanufacturing, bath equipment, hot-water supply, air conditioner, and factory machine industries, which require highly environment-resistive capabilities.

Note: 1. The above current ratings are the values of the steadystate current.
2. Inductive load has a power factor of 0.7 min . AC ) and a time constant of 7 ms max. (DC).
3. Lamp load has an inrush current of 10 times the steadystate current.
4. Motor load has an inrush current of 6 times the steadystate current.
5. The ratings values apply under the following test conditions:
Ambient temperature: $20 \pm 2^{\circ} \mathrm{C}$
Ambient humidity: $65 \pm 5 \%$
Operating frequency: 30 operations $/ \mathrm{min}$

## ■ Dimensions and Operating Characteristics

Note: 1. All units are in millimeters unless otherwise indicated.
2. The following illustrations and dimensions are for models with soldered terminals. Refer to Terminals for models with quick-connect and PCB terminals (\#110).
3. The dimensions not described are the same as those of models with pin plungers.
4. Unless otherwise specified, tolerance of $\pm 0.4 \mathrm{~mm}$ applies to all dimensions.
5. The $\square$ in the model number is for a terminal code such as $H, T, D$, or $M$.

## Precautions

## - Cautions

## Mounting Dimensions

Use two M3 mounting screws with spring washers to mount the Switch. Tighten the screws to a torque of 0.23 to $0.26 \mathrm{~N} \cdot \mathrm{~m}\{2.3$ to $2.7 \mathrm{kgf} \bullet \mathrm{cm}\}$.

Mounting Holes

## PCB Mounting

## Degree of Protection

The D2SW was tested underwater and passed the following watertightness tests, which however, does not mean that the D2SW can be used in the water.
IEC Publication 529, degree of protection IP67. Refer to the following illustration for the test method.

## Protection Against Chemicals

Prevent the Switch from coming into contact with oil and chemicals. Otherwise, damage to or deterioration of Switch materials may result.

## ■ Correct Use

Refer to page 2242 for common precautions.
Operation
With the pin plunger models, set the Switch so that the plunger can be pushed in from directly above. Since the plunger is covered with a rubber cap, applying a force from lateral directions may cause damage to the plunger or reduction in the sealing capability.

## Handling

Handle the Switch carefully so as not to break the sealing rubber of the plunger.

## - Connector

Refer to terminal connections on pag\&14.

[^0]:    Note: The standard lengths of the lead wires (AV0.5f) of models incorporating them are 30 cm
