Limit Switch

## Small, Economical Switch Featuring a Positive Opening Mechanism and Conforming to the CE Mark

- Features positive opening mechanism (NC contacts only) that opens contacts, thus preventing faulty operation due to factors such as metal deposition. (Slow-action type has received positive opening approval.)
- Double insulation makes ground terminal unnecessary. (Bears $\square$ marking.)
- Conforms to EN (TÜV) standards corresponding to the CE mark.
- Wide standard operating temperature range: $-30^{\circ} \mathrm{C}$ to $70^{\circ} \mathrm{C}$.
- Series expanded to include 2-conduit type and 4 actuator types: cat whisker, plastic rod, metal lever, and fork lever lock.
- Safety Standards:
- Conformity:

Machinery Directive
Low Voltage Directive
EN50047
EN1088

## Approved Standards

## Snap-action Models

| Agency | Standard | File No. |
| :--- | :--- | :--- |
| TÜV <br> Rheinland | EN60947-5-1 | J9950233 <br> (Positive opening <br> approved.) |
| UL | UL508 <br> CSA C22.2 No. 14 | E76675 |

Note: CSA C22.2 No. 14 compliance was verified and approved by UL (Marked with (UL)).

## Slow-action Models

| Agency | Standard | File No. |

|  | 2-conduit | Pg13.5 |  | D4D-5187N |  | --- |  | D4D-5A87N |
|  |  | G1/2 |  | D4D-6187N |  | --- |  | D4D-6A87N |

Note: 1. It is recommended that Pg13.5 be used for Switches to be exported to Europe and $1 / 2-14$ NPT be used for Switches to be exported to North American countries.
2. Adjustable rod lever actuators for snap-action models (model number: D4D- $\square \square 29 \mathrm{~N}$ ) are available separately.
3. The switches are marked with " $\Theta$ " indicating approval by TÜV Rheinland for the positive opening mechanism. Adjustable roller lever and fork lever lock models are approved by TÜV Rheinland for the positive opening mechanism, but not by the GS-ET-15 standard (BIA) nor by SUVA.
4. Right operation: Contact 11-12 is positively opened, when the lever on the right is lowered. Left operation: Contact $11-12$ is positively opened, when the lever on the left is lowered.

## ■ Characteristics

| Degree of protection | IP65 (EN60947-5-1) |
| :---: | :---: |
| Life expectancy (see note 2) | Mechanical: 15,000,000 operations min. (see note 3) <br> Electrical: $\quad 150,000$ operations min. (Refer to Operating Characteristics for snap-action.) |
| Operating speed | $1 \mathrm{~mm} / \mathrm{s}$ to $0.5 \mathrm{~m} / \mathrm{s}$ (with D4D-1120N) |
| Contact gap | Snap-action: $2 \times 0.5 \mathrm{~mm}$ min. Slow-action: $2 \times 2 \mathrm{~mm}$ min. |
| Operating frequency | Mechanical: 120 operations/min min. Electrical: 30 operations/min min. |
| Rated frequency | $50 / 60 \mathrm{~Hz}$ |
| Insulation resistance | $100 \mathrm{M} \Omega$ min. (at 500 VDC ) between terminals of the same polarity and between each terminal and non-current-carrying metal parts |
| Contact resistance | $25 \mathrm{~m} \Omega$ max. (initial value) |
| Dielectric strength | Snap-action <br> Uimp 2.5 kV between terminals of the same polarity <br> Uimp 4 kV between each terminal and non-current-carrying metal parts <br> Slow-action <br> $\mathrm{U}_{\text {imp }} 4 \mathrm{kV}$ between terminals of the same polarity, between terminals of different polarity, and between each terminal and non-current-carrying metal parts |
| Rated insulation voltage ( $\mathrm{U}_{\mathrm{i}}$ ) | 400 V (EN60947-5-1) |
| Switching overvoltage | 1,500 V max. (EN60947-5-1) |
| Pollution degree (operating environment) | 3 (EN60947-5-1) |
| Short-circuit protective device (SCPD) | 10 A , fuse type gl or gG (IEC269) |
| Conditional short-circuit current | 100 A (EN60947-5-1) |
| Conventional enclosed thermal current (lthe) | 10 A (EN60947-5-1) |
| Protection against electric shock | Class II (double insulation) |
| Vibration resistance | Malfunction: 10 to $55 \mathrm{~Hz}, 0.75-\mathrm{mm}$ single amplitude |
| Shock resistance | Destruction: $1,000 \mathrm{~m} / \mathrm{s}^{2} \mathrm{~min}$. Malfunction: $300 \mathrm{~m} / \mathrm{s}^{2} \mathrm{~min}$. |
| Ambient temperature | Operating: $-30^{\circ} \mathrm{C}$ to $70^{\circ} \mathrm{C}$ (with no icing) |
| Ambient humidity | Operating: 95\% max. |
| Weight | Approx. 70 g (for D4D-1120N) Approx. 86 g (for D4D-5120N) |

Note: 1. The above figures are initial values.
2. Life expectancy values are calculated at an operating temperature of 5 to $35^{\circ} \mathrm{C}$, and an operating humidity of 40 to $70 \%$. Contact your OMRON sales representative for more detailed information on other operating environments.
3. The mechanical life expectancy of the fork lever lock model is $10,000,000$ operations min.

| RF min. | 0.49 N | 0.42 N | 0.49 N | 0.42 N | 1.47 N |  | 0.78 N | 0.88 N |
| $\begin{array}{\|l\|} \hline \text { PT } \\ \text { (see note 3) } \\ \hline \end{array}$ | $18^{\circ}$ to $27^{\circ}$ |  |  |  | 2 mm max. |  | 4 mm max. |  |
| PT (2nd) (see note 4) | $\left(44^{\circ}\right)$ |  |  |  | $(2.9 \mathrm{~mm})$ |  | ( 5.2 mm ) | $(4.3 \mathrm{~mm})$ |
| OT min. | $40^{\circ}$ |  |  |  | 4 mm |  | 5 mm |  |
| OP | --- |  |  |  | $18 \pm 0.5 \mathrm{~mm}$ | $28.2 \pm 0.8 \mathrm{~mm}$ | $37 \pm 0.8 \mathrm{~mm}$ | $27 \pm 0.8 \mathrm{~mm}$ |
| $\begin{aligned} & \hline \text { TT } \\ & \text { (see note 5) } \\ & \hline \end{aligned}$ | (70 ${ }^{\circ}$ |  |  |  | (6 mm) |  | (9 mm) |  |
| POT min. (see note 6) | $50^{\circ}$ |  |  |  | 3.2 mm |  | 5.8 mm | 4.8 mm |
| POF min. (see note 6) | 19.61 N |  |  |  | 19.61 N |  |  |  |

Note: 1. The operating characteristics of these Switches were measured with the roller lever set at 30 mm .
2. The operating characteristics of these Switches were measured with the roller lever set at 31 mm .
3. Measured with NC side in the OFF state.
4. PT (2nd) is the distance required before NO contact occurs.

PT (2nd) is the reference value.
5. Nominal value.
6. POT (positive opening travel) and POF (positive opening force) are required values for positive opening.

## Slow-action (1NC/1NO), Slow-action (2NC)

1-conduit and 2 -conduit Models

| Model | D4D- $\square$ REN | D4D- $\square \square$ LEN |
| :--- | :--- | :--- |
| Force necessary to reverse the direction of the lever: max. | 6.37 N |  |
| Movement until the lever reverses | $45^{\circ}$ to $65^{\circ}$ |  |
| Movement until switch operation (NC) | $\left(6.5^{\circ}\right)$ |  |
| Movement until switch operation (NO) | $\left(18.5^{\circ}\right)$ |  |
| POT min. | $30^{\circ}$ |  |
| POF min. | 19.61 N |  |

Note: POT (positive opening travel) and POF (positive opening force) are required values for positive opening.

## Engineering Data

Electrical Life Expectancy
(1NC/1NO Contact, Snap-action)
$(\cos \phi=1)$

$(\cos \phi=0.4)$

Switching current (A)

## Nomenclature

## Operation

## - Positive Opening Mechanism

## 1NC/1NO Contact (Snap-action)

Conforms to EN60947-5-1 Positive Opening $\rightarrow$
If metal deposition between mating contacts occurs on the NC contact side, they can be pulled apart by the shearing force and tensile force generated when part B of the safety cam or plunger engages part A of the movable contact blade. When the safety cam or plunger is moved in the direction of the black arrow, the Limit Switch releases.

1NC/1NO Contact (Slow-action)
 Conforms to EN60947-5-1 Positive Opening $\longrightarrow$

When metal deposition occurs, the contacts are separated from each other by the plunger being pushed in.

2NC Contact (Slow-action)

Conforms to EN60947-5-1 Positive Opening
When metal deposition occurs, the contacts are separated from each other by the plunger being pushed in.

■ Contact Form (EN60947-5-1, EN50013)

| Model | Contact type | Contact | Diagrams (see note) |  |  | Remarks |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| D4D- $\square 1 \square \mathrm{~N}$ | 1NC/1NO (snap-action) |  | $\begin{aligned} & \\ & 11-12 \\ & 13-14 \end{aligned}$ | $\begin{array}{c\|c} (1.4 \mathrm{~mm}) \\ \hline & \\ \hline \end{array}$ | $\square$ | Only NC contact 11-12 has an approved positive opening mechanism. <br> Terminal numbers 11-12 and 13-14 cannot be used as unlike poles. |
| D4D- $\square 5 \square \mathrm{~N}$ | 1NC/1NO (slow-action) |  | $\begin{array}{ll}  & 0 \\ 11-12 \\ 23-24 \end{array}$ | $(1.4 \mathrm{~mm})$ | ( 7 mm ) $\square$ | Only NC contact 11-12 has an approved positive opening mechanism. <br> Terminal numbers 11-12 and 23-24 can be used as unlike poles. |
| D4D- $\square$ A $\square \mathrm{N}$ | 2NC <br> (slow-action) |  | $\begin{aligned} & \text { 11-12 } \\ & 21-22 \end{aligned}$ | $(1.4 \mathrm{~mm})$ | ( 7 mm ) $\square$ | Both NC contacts $11-12$ and 23-24 have an approved positive opening mechanism. <br> Terminal numbers 11-12 and 21-22 can be used as unlike poles. |

Note: 1. Contact operation

Closed Open
2. Terminals numbers are assigned according to EN50013 and the contact symbols are assigned according to the IEC947-5-1.

## Dimensions

## ■ 1-conduit Models

Note: 1. All units are in millimeters unless otherwise indicated.
2. Unless otherwise specified, a tolerance of $\pm 0.4 \mathrm{~mm}$ applies to all dimensions.
3. When placing your order, specify the conduit type by adding a code from the list below to the blank box of the following model numbers as shown below.
1: PG 13.5
2: G 1/2
3: 1/2-14NPT

Roller Lever (Resin Lever)
D4D- $\square 120 \mathrm{~N}$
D4D- $\square 520 \mathrm{~N}$
D4D- $\square$ A20N

Roller Lever (Metal Lever)
D4D- $\square 122 N$
D4D- 522 N
D4D- $\square$ A22N

Adjustable Roller Lever
D4D- $\square 121 \mathrm{~N}$
D4D- $\square 521 \mathrm{~N}$
D4D- $\square$ A21N

Adjustable Roller Lever
(with Rubber Roller)

Plunger
D4D- $\square 131 \mathrm{~N}$
D4D- $\square 531 \mathrm{~N}$
D4D- $\square$ A31N

## Roller Plunger <br> D4D- $\square 132 \mathrm{~N}$ <br> D4D- $\square 532 \mathrm{~N}$ <br> D4D- $\square$ A32N

One-way Roller Arm Lever (Horizontal)
D4D- $\square 162 \mathrm{~N}$
D4D- $\square 562 \mathrm{~N}$
D4D- $\square$ A62N

(See note 3)

One-way Roller Arm Lever
(Vertical)
D4D- $\square 172 \mathrm{~N}$
D4D- $\square$ 572N
D4D- $\square$ A72N

Fork Lever Lock
(Right Operation)

## D4D-15REN

Fork Lever Lock
(Left Operation)
D4D-15LEN

Cat Whisker
D4D- $\square 80 \mathrm{~N}$

Plastic Rod
D4D- $\square \square 87 \mathrm{~N}$

## - 2-conduit Models

Note: 1. All units are in millimeters unless otherwise indicated.
2. Unless otherwise specified, a tolerance of $\pm 0.4 \mathrm{~mm}$ applies to all dimensions.
3. When placing your order, specify the conduit type by adding a code from the list below to the blank box of the following model numbers as shown below.
5: PG 13.5
6: G 1/2
4. The minimum number of screw threads is five when the $\operatorname{Pg} 13.5$ conduit is used and four when the G1/2 conduit is used.

## Roller Lever (Resin Lever)

D4D- $\square 120 \mathrm{~N}$
D4D- $\square 520 \mathrm{~N}$
D4D- $\square$ A20N

## Roller Lever (Metal Lever)

D4D- $\square 122 N$
D4D- $\square 522 N$
D4D- $\square$ A22N

Adjustable Roller Lever

Adjustable Roller Lever
(Rubber Roller Lever)
D4D- $\square 127 N$
D4D- $\square 527 \mathrm{~N}$
D4D- $\square$ A27N

Plunger
D4D- $\square 131 \mathrm{~N}$
D4D- $\square 531 \mathrm{~N}$
D4D- $\square$ A31N

Two, $3 \pm 0.05$ dia
Depth: 6

## Roller Plunger

D4D- $\square 132 \mathrm{~N}$
D4D- $\square 532 \mathrm{~N}$
D4D- $\square$ A32N

One-way Roller Arm Lever (Horizontal)
D4D- $\square$ 162N
D4D- $\square 562 \mathrm{~N}$ D4D- $\square$ A62N

One-way Roller Arm Lever
(Vertical)
D4D- $\square 172 N$
D4D- $\square 572 N$
D4D- $\square$ A72N

Fork Lever Lock (Right Operation) D4D-55REN

Fork Lever Lock
(Left Operation) D4D-55LEN

Cat Whisker
D4D- $\square 180 \mathrm{~N}$ D4D- $\square$ A80N

## ■ Levers

Refer to the following for the angles and positions of the watchdogs.

Roller Lever
(D4D- $\square \square$ 20N, D4D- $\square \square$ 22N)

## Sealed Plunger

(D4D- $\square \square 31 N$ )

One-way Roller Arm Lever (Horizontal)
(D4D-■ $\square$ 62N)

Adjustable Roller Lever (D4D- $\square \mathbf{2 1 N}$ ) (Reference Value)

Adjustable Roller Lever
(Rubber Roller Lever)
(D4D- $\square \mathbf{2 7 N}$ ) (Reference Value)

Roller Plunger
(D4D- $\square$ 32N)

## One-way Roller Arm Lever

 (Vertical)(D4D-■ 72N)

## Precautions

| CAUTION |
| :--- |
| Do not use metal connectors or conduits to wire the Limit <br> Switch, otherwise the conduit of the Limit Switch may break <br> and an electric shock may be received. |

- If the $\mathrm{D} 4 \mathrm{D}-\square \mathrm{N}$ is applied to an emergency stop circuit or safety circuit for prevention of injury, use a D4D- $\square \mathrm{N}$ model that has an NC contact equipped with a force-separation mechanism, and make sure that the D4D- $\square \mathrm{N}$ operates in the positive mode Furthermore, secure the D4D- $\square \mathrm{N}$ with screws or equivalent parts that are tightened in a single direction so that the D4D- $\square \mathrm{N}$ cannot be easily removed. Then provide a protection cover for the D4D- $\square \mathrm{N}$ and post a warning label near the D4D- $\square \mathrm{N}$.
- Be sure to connect a fuse with a breaking current 1.5 to 2 times larger than the rated current to the Limit Switch in parallel in order to protect the Limit Switch from damage due to short-circuiting.
- When using the Limit Switch for the EN ratings, use the gl or gG 10-A fuse.

## Operating Environment

The Limit Switch is intended for indoor use only. Using the Limit Switch outdoors may result in a malfunction.

## Correct Tightening Torque

A loose screw may result in a malfunction. Be sure to tighten each screw to the proper tightening torque as shown below.

| No. | Type | Torque |
| :--- | :--- | :--- |
| 1 | Terminal screw | 0.59 to $0.78 \mathrm{~N} \cdot \mathrm{~m}$ |
| 2 | Cover mounting screw | 0.78 to $0.88 \mathrm{~N} \cdot \mathrm{~m}$ |
| 3 | Head mounting screw | 0.78 to $0.88 \mathrm{~N} \cdot \mathrm{~m}$ |
| 4 | Lever mounting screw | 1.57 to $1.77 \mathrm{~N} \cdot \mathrm{~m}$ |
| 5 | Switch mounting screw <br> (M4) | 0.49 to $0.69 \mathrm{~N} \cdot \mathrm{~m}$ |
| 6 | Connector | 1.8 to $2.2 \mathrm{~N} \cdot \mathrm{~m}$ <br> 1.37 to $1.77 \mathrm{~N} \cdot \mathrm{~m}$ <br> (see note) |
| 7 | Cap screw | 1.27 to $1.67 \mathrm{~N} \cdot \mathrm{~m}$ |

Note: This applies to the $1 / 2-14$ NPT connector.

## Operating Method

Use of the Limit Switch at an improper dog angle, operating speed, or operating direction will eventually cause a failure in Limit Switch. Make sure that the dog angle, operating speed, and operating direction are within the specified ranges. Do not set the dog angle to $90^{\circ}$.

## Mounting

Fasten the Switch with two M4 Allen-head bolts and washers. Provide a stud with a diameter of $4^{-0.05 /}-0.15$ and a height of 4.8 mm max. at two places as shown below so that the Switch is firmly fixed at four points.

## Mounting Holes/Studs

## 1-conduit Models

## 2-conduit Models

## Changing the Lever Angle

- To change the angle of the lever, loosen the lever mounting screw. Then the lever can be set at any angle in $7.5^{\circ}$ increments.
- The length of a variable roller lever can be changed by loosening the lever mounting screw.
- The lever mounting position may be inside out after removing the lever mounting screw. Make sure that the lever will not touch the Switch when the lever is mounted inside out.

## Changing the Head Direction

If the head direction has been changed, check the torque of each screw and make sure that the screws are free of foreign substances, and that each screw is tightened to the proper torque.

## Wiring

- Do not connect the bare lead wires directly to the terminals but be sure to connect each of them by using an insulation tube and M3.5 round solderless terminals and tighten each terminal screw within the specified torque range.
- The proper lead wire is 20 to 14 AWG ( 0.5 to $2.5 \mathrm{~mm}^{2}$ ) in size.

Perform wiring for the crimp terminals in the orientation shown below, so that they are not resting on the case or the cover.

## Correct

Incorrect

Crimp-style terminal
Correct

## Processing the Conduit Opening

Tighten the connector to a torque of 1.8 to $2.2 \mathrm{~N} \cdot \mathrm{~m}$ ( 1.37 to $1.77 \mathrm{~N} \cdot \mathrm{~m}$ if it is a $1 / 2-14 \mathrm{NPT}$ ). Excessive tightening torque may damage the casing. To satisfy IP65, apply sealing tape to the connector conduit.
The diameter of the cable must be suited to the corresponding connector.
When performing wiring, close conduit openings in any places that will not be used using the cap screws provided as accessories. Tighten the screws to the applicable torque.

Recommended Connector

| Conduit size | Manufacturer | Model | Applicable <br> cable diameter |
| :--- | :--- | :--- | :--- |
| G1/2 | OMRON | SC-6 | 7.5 to 9.0 mm |
|  | LAPP <br> (see note 1) | ST-PF1/2 <br> $5380-1002$ | 6.0 to 12.0 mm |
|  | Ohm Denki <br> (see note 2) | OA-W1609 | 7.0 to 9.0 mm |
|  | LAPP <br> (see note 1) | ST13.5 <br> $5301-5030$ | 5.0 to 12.0 mm |
| $1 / 2-14 N P T$ | LAPP <br> (see note 1) | ST-NPT1/2 <br> $5301-6030$ | 6.0 to 12.0 mm |

Note: 1. LAPP is a German manufacturer.
2. Ohm Denki is a Japanese manufacturer.
