Compact Magnetic Non-contact Safety Switches

## F3S-TGR-N

## Magnetic Non-contact switches

 are designed to interlock hinge, sliding or removal guard doors.- Contact-free detection of the closing/ opening of a door
- Non-contact = no abrasion = no particles
- Excellent coverage of mechanical tolerances
- Can operate behind stainless steel fittings
- Conforms to safety categories up to 4 acc.

EN 954-1 and PDF-M acc. EN60947-5-3

## Model Number Structure

1. Type

L: Elongated Sensor
S: Small Sensor
2. Housing Material

P: Plastic Housing
M: Stainless Steel Housing
3: Contact configuration
20: 2 Normally Closed Contacts (NC)
21: 2 Normally Closed Contacts (NC) + 1 Normally Open Contact (NO)

4: Cable Length/connection
02: 2 m Cable
05: 5 m Cable
10: 10 m Cable
M1J8: M12 male connector, 8pin

## Ordering Information

| Elongated Sensors | Type | Cable Connection | Contact Configuration |
| :---: | :---: | :---: | :---: |
|  | F3S-TGR-NLPR-20-02 | 2 m pre-wired | 2NC |
|  | F3S-TGR-NLPR-20-05 * | 5 m pre-wired | 2NC |
|  | F3S-TGR-NLPR-20-10 | 10 pre-wired | 2NC |
|  | F3S-TGR-NLPR-20-M1J8 | M12, 8-pin | 2NC |
|  | F3S-TGR-NLPR-21-02 | 2 m pre-wired | 2NC/1NO |
|  | F3S-TGR-NLPR-21-05 * | 5 m pre-wired | 2NC/1NO |
|  | F3S-TGR-NLPR-21-10 | 10 pre-wired | 2NC/1NO |
|  | F3S-TGR-NLPR-21-M1J8 | M12, 8-pin | 2NC/1NO |

## Specifications

Mechanical Data

|  |  | Elongated Sensor | Small sensor |
| :--- | :--- | :--- | :--- |
| Operating distance | OFF $\rightarrow$ ON (Sao) | 10 mm Close |  |
|  | ON $\rightarrow$ OFF (Sar) | 22 mm Open |  |
| Actuator approach speed | Min. <br> Max. | $4 \mathrm{~mm} / \mathrm{s}$ <br> $1000 \mathrm{~mm} / \mathrm{s}$ |  |
|  | Max. | 1 Hz | $-25^{\circ} \mathrm{C} \ldots+105^{\circ} \mathrm{C}$ |
| Operating temperature |  | $-25^{\circ} \mathrm{C} \ldots+80^{\circ} \mathrm{C}$ |  |
| Enclosure protection | Flying lead <br> M12 connector | IP 67 |  |
| Material |  | Black Polycarbonate |  |
| Mounting bolts |  | $2 \times \mathrm{M} 4$ recommended |  |
| Tightening torque | Max. | 1 Nm |  |
| Mounting position |  | any |  |
| Mechanical life expectancy |  | 10.000 .000 cycles |  |
| Electrical life expectancy |  | 1.000 .000 cycles |  |
|  | 2.000 .000 cycles @ 24VDC/100mA |  |  |

## Electrical Data

|  |  | Elongated Sensor | Small sensor |
| :--- | :--- | :--- | :--- |
| Contact release time | Max. | 2 ms |  |
| Initial contact resistance | Max. | 50 mA |  |
| Switching current | Min. | $1 \mathrm{~mA} @ 10 \mathrm{VDC}$ |  |
| Rated load s | Max. | $1 \mathrm{~A} @ 25 \mathrm{VAC}$ |  |
| NC contacts |  | $0.2 \mathrm{~A} @ 24 \mathrm{VDC}$ |  |
| NO contact |  | $100 \mathrm{M} \Omega$ |  |
| Insulation resistance |  | 500 VAC |  |
| Rated insulation voltage |  |  |  |

## Approved Standards

- EN standards certified by TÜV Rheinland
- EN 954-1
- EN 60204-1
- EN/IEC 60947-5-3
- UL 508, CSA C22.2
- BS 5304
- EN 1088-1 conformance

## Connection diagram

Cable version
Pin No. Signal name

| red blue | NC Channe |
| :---: | :---: |
|  | NC Channel 1 |
| black | NC Channel 2 |
| white | NC Channel 2 |
| yellow | NO Channel |
| green | NO Channel |
|  |  |
| orange |  |

M12-Connector version
Pin No. Signal name

Note: If the auxiliary circuit is not fitted or not used then cut and discard the Yellow and Green Conductors.

## Operating characteristics

5 mm misalignment tolerance after setting

## Dimensions

## Elongated Sensor (Sensor/Actuator)

F3S-TGR-NLPR

Small Sensor (Sensor/Actuator)
F3S-TGR-NSMR

Wiring examples (Single head connection up to category 4 acc. EN954-1)

## G9SA

## Single Sensor Application with G9SA-301

(up to Safety Category 4 acc. EN954-1)

Series connection Application, up to 6 Sensors with G9SA-301
(up to Safety Category 3 acc. EN954-1)

## G9SB

Single Sensor Application with G9SB-2002-C (up to Safety Category 4 acc. EN954-1)

Series connection Application, up to 6 Sensors with G9SB-2002-C
(up to safety Category 3 acc. EN954-1)

G9SX
Single Sensor Application with G9SX-AD322-T15
(up to Safety Category 4 acc. EN954-1)

Series connection Application, up to 6 Sensors with G9SX-AD322-T15
(up to Safety Category 3 acc. EN954-1)

DeviceNet Safety NE1A and DST1-I/O-Terminals
Single Sensor Application with NE1A and DST1-Safety-IO
(up to safety Category 4 acc. EN954-1)

NE1A-...
DST1-ID...
DST1-MD...
DST1-MRD...
Series connection Application, up to 6 Sensors with NE1A or DST1-Safety-IO (up to Safety Category 3 acc. EN954-1)

NE1A-.

DST1-MD..
DST1-MRD...

Application with multiple Sensors with NE1A or DST1-Safety-IO
(up to Safety Category 4 acc. EN954-1)

Switch 1:
Test $0 \quad \ln 0$
Test $1 \quad \ln 1$
Switch 2:
Test $0 \quad \ln 2$
Test 2 In 3
Switch 3:
Test $1 \quad \ln 4$ Test 2 In 5

## © WARNING

Be sure to turn OFF the power before performing wiring. Do not touch charge parts (e.g., terminals) while power is ON. Doing so may result in electric shock.

Do not allow the actuator to come close to the switch with the door open. Doing so may cause machinery to start operating and may result in injury.

Keep actuators (magnets) away from magnetically sensitive equipment like PC harddisks, floppy disks etc.
The magnetic field of the magnet will damage existing data.

## $\triangle$ CAUTION

Use guard stops in the way shown below to ensure that the switch and actuator do not make contact when the guard door is closed.

## Application Precautions

- Do not use the product in locations subject to explosive or flammable gases.
- Do not use load currents exceeding the rated value.
- Be sure to wire each conductor correctly.
- Be sure to confirm correct operation after completing mounting and adjustment.
- Do not drop or attempt to disassemble the product.
- Be sure to use the correct combination of switch and actuator.
- Use a power supply of the specified voltage. Do not use power supplies with large ripples or power supplies that intermittently generate incorrect voltages.
- Capacitors are consumable and require regular maintenance and inspection.

## Precautions for Safe Use

## Mounting Direction of Switch and Actuator

The Sensor will not operate properly if the switch and actuator come towards each other diagonally. The Sensor will, however, operate properly if the switch and actuator come towards each other headon, horizontally or vertically (as long as the faces have the same orientation).

## Mutual Interference

If the switch and actuator are mounted in parallel, be sure to separate them by at least 25 mm , as shown below.

## Using for Hinged Doors

On hinged doors, install the Sensor at an opening edge as shown below.

## Solvents

Ensure that solvents, such as alcohol, thinner, trichloroethane, or gasoline do not adhere to the product. Solvents may cause markings to fade and components to deteriorate.

## Installation Location

Do not install the product in the following locations. Doing so may result in product failure or malfunction.

- Locations subject to direct sunlight
- Locations subject to humidity levels outside the range $35 \%$ to $85 \%$ or subject to condensation due to extreme temperature changes
- Locations subject to corrosive or flammable gases
- Locations subject to shocks or vibration in excess of the product ratings
- Locations subject to dust (including iron dust) or salts

Take appropiate and sufficient countermeasures when using the product in the following locations.

- Locations subject to static electricity or other forms of noise
- Locations subject to possible exposure to radioactivity
- Locations subject to power supply lines

Wiring
Perform wiring using wire with the following dimensions.
Stranded wire: $2.5 \mathrm{~mm}^{2}$
Solid wire: $\quad 4.0 \mathrm{~mm}^{2}$
Tighten the terminal screws with the specified torque. Not doing so may result in malfunction or abnormal heat generation.
Terminal screw tightening torque: $1 \mathrm{~N} \cdot \mathrm{~m}$
