## Relay Pullout Tool

## R99-01 for G6DS

A convenient removal pullout tool (R99-01 for G6DS) is available to pull Relays out of special sockets mounted closely side by side.

## Packing

## - Stick packing

1 stick = 25 Relays
1 packing case $=20$ sticks ( 500 Relays)
1 carton box = 6 packing cases (3,000 Relays)

## Precautions

More than two Relays can be closely mounted right side up as shown in the following illustration. (This applies to the P6DS as well.)

More than two Relays can be closely mounted upside down as shown in the following illustration.

Note: The space between Relays required for heat radiation may vary with operating conditions. Contact your OMRON representative for details.

## Socket Mounting Height

When mounting the Relay, insert it into the Socket as vertically as possible so that the Relay terminals contact securely with the contact pins on the Socket.
The P6DS is flux-resistive. Do not wash the P6DS with water. Dismount the Relay from the Socket before soldering the Socket to a PCB.
