

Wiring Precautions

- Do not make any mistake in polarity when supplying DC power to the K3NV.
- Do not wire power lines alongside the signal lines of the K3NV in order to prevent the K3NV from noise interference.
- Wire the terminal block with crimp terminals.
- Tighten the terminal screws to the torque of approx. $0.78 \text{ N} \cdot \text{m}$ ($8 \text{ kgf} \cdot \text{cm}$).
