

Multipoint Temperature Controller

E5ZE-8□D1□B

Multipoint Temperature Controller Connects to the Programmable Controller with Ease

- Conforms to DeviceNet requirements with remote I/O and FINS message communications, thus connecting to a CompoBus/D Master without programs for remote I/O communications and to OMRON's Programmable Controller with ease for FINS message communications.
- High-speed input sampling requires only 0.2 s at a maximum of eight temperature inputs.

Precautions

Mounting the Controllers

Side-by-side, Close Mounting

Saves space and improves wiring efficiency.

Wall Mounting

Can be mounted to places with limited depth.

General Mounting Precautions

The side of the E5ZE with the terminal block and connectors must not face up, otherwise operating errors may result.

Prepare four M4 screws to mount the E5ZE to control panels. Use flat washers and spring washers with screws to mount the E5ZE to control panels so that the screws will not loosen.

The mounting brackets must be attached to the E5ZE with the four M3 x 6 screws provided with the E5ZE and each of the screws should be tightened to a torque of 0.43 to 0.58 N • m, or 4.4 to 5.9 kgf • cm.

Do not mount as shown in the following diagram.

ALL DIMENSIONS SHOWN ARE IN MILLIMETERS.

To convert millimeters into inches, multiply by 0.03937. To convert grams into ounces, multiply by 0.03527.
